Henrik Wold Nilsen, Senior Portfolio Manager

- ❖ Joined Storebrand Asset Management in 2010
- ❖ Masters in theoretical high energy physics (University of Bergen, 2005)
- ❖ Doctorate in experimental high energy physics (University of Freiburg, Germany, 2009)
- ❖ Post-doctoral position in Freiburg in connection with research lab CERN, Geneva (2009-2010)

ABOUT STOREBRAND

Storebrand Asset Management is Norway’s largest private asset manager and a specialist in sustainable investing.

Rather than only applying ESG criteria to a proportion of assets, Storebrand believes sustainability must be implemented across entire portfolios. All assets are managed according to the industry-leading [Storebrand Standard](#) sustainability criteria.

Climate change poses a growing threat to our future, including the stability of our financial system¹. Global equity markets contain high carbon risk and fossil fuel exposures, meaning that traditional passive investments represent increasing unmanaged climate risks.

To address this problem, we have been managing sustainable index funds since 2005, successfully optimising portfolios to minimise climate risk and tracking error. Our funds’ performance demonstrates that incorporating sustainability has not diminished returns.

INVESTMENT STRATEGY

[Storebrand Global ESG Plus](#) is a unique fossil-free global equity strategy which aims to provide long-term capital growth through a model-based portfolio of developed market equities. The fund is managed systematically and seeks to reproduce the risk and return profile of the MSCI World Index whilst excluding companies within fossil fuel related industries and with additional ESG criteria and sustainability focus.

Since inception over three years ago, the Norwegian-domiciled fund has provided index relative returns of +0.5% with 1.5% tracking error². The strategy seeks to provide a low-cost investment solution for the global climate emergency by using six key components:

DIVESTMENT

We exclude fossil fuels (>5% of sales) and companies with climate negative exposures (e.g. plastics and meat). The strategy is Paris-aligned and considers climate risk across the value chain.

GREEN SOLUTIONS

We allocate 10% of the portfolio to climate solutions companies, such as renewable energy, green transport, recycling, water and energy efficiency.

LOW CARBON FOOTPRINT

We optimise the fund, using full lifecycle emissions where possible, to minimise carbon exposure. The result is a portfolio with significantly lower carbon intensity than the benchmark³.

GREEN SOLUTIONS

We allocate <10% of the portfolio to climate solutions companies, such as renewable energy, green transport, recycling, water and energy efficiency.

LOBBYING

Companies are not passive actors in climate policy. We engage with but avoid investing in those lobbying against climate action, using data from InfluenceMap and other sources.

ESG SCORE

We have developed a proprietary ESG rating system to analyse over 4,500 companies, using qualitative and quantitative assessment of sustainability risks and opportunities.

FUND PERFORMANCE

	Q3 2022	YTD 2022	1-Year	Since Inception
Storebrand Global ESG Plus Lux B GBP	1.23%	-12.27%	-6.25%	8.79%
MSCI World Index	2.29%	-9.48%	-2.71%	9.29%
Relative return	-1.06%	-2.79%	-3.54%	-0.50%

Performance figures in GBP, net of fees

INVESTMENT STRATEGY COMMENTARY¹

- After being on pause for over a year, the US Democrat’s efforts to pass an ambitious climate change bill got back on track during July. This, as well as continued European efforts to increase the speed of the low carbon transition to reduce dependency on Russian energy, provided a tailwind for the fund’s investments in climate solutions companies.
- The fund’s pure-play climate solutions allocation was increased from 10% to 12% at the end of Q2. During Q3, it contributed +0.5% to relative returns, with +0.3% attributable to renewable electricity companies while water and recycling themes each contributed +0.1%.
- The largest negative contribution came from the fund’s broad stock market exposure, which represents just under 90% of assets. This part of the portfolio, which is managed with additional ESG criteria and a sustainability focus, contributed +0.2% in Q1 and +1.0% in Q2 but detracted -0.7% from relative returns during Q3. No single company contributed more than -0.05%, indicating the underperformance was attributable to a broad range of individual positions.
- The loss relative to benchmark from not investing in producers and distributors of fossil fuels was -0.3%. This brings fossil fuel-related underperformance to -2.7% year-to-date, compared with the fund’s underperformance of -2.9% over the same period. The (fossil) energy sector of the MSCI World Index has outperformed the broader benchmark by almost 50% year-to-date, whereas no other sector has had relative performance outside of the range +/-15%. It has not been possible for the fund’s optimization strategy to compensate for such a large differential.
- Following the Storebrand Standard exclusion list was neutral this quarter, whereas not investing in alcohol, gambling and weapons detracted -0.1% on a relative basis.
- The fund’s currency exposure, which differs slightly to the index, contributed -0.2% to relative returns.
