ABOUT STOREBRAND

Storebrand Asset Management is Norway's largest private asset manager and a specialist in sustainable investing. Sustainability is integral to Storebrand's business and our ESG analysis, which aligns with the UN's Sustainability Development Goals, is fully integrated into the investment processes for all assets under management. Our long-term vision for the year 2050 is a world where nine billion people live well, within the earth's natural limits, and we believe that the companies which contribute to solving society's problems in a sustainable way will also be the most profitable in the long run.

INVESTMENT COMMENTARY

Storebrand Global Solutions is an actively managed global equity portfolio investing in sustainable impact companies. The strategy is fossil-free and seeks to generate alpha by identifying businesses from developed and emerging markets that provide solutions to help achieve the UN's Sustainable Development Goals. The portfolio is centred on four complimentary investment themes; renewable energy, smart cities, circular economy and equal opportunities.

- Of the portfolio's four themes, equal opportunities was the best performer over the quarter, led by Palo Alto Networks, CrowdStrike Holdings and Bank Rakyat.
- Renewable Energy underperformed during the quarter but saw a relative resurgence as a result of the war in Ukraine, and corresponding energy scenarios in Europe.
- During the quarter the fund entered into positions in Aurubis, Sims Metal Management and Schneider Electric, and exited from UPM, Electrolux, Itron and Tencent.
- During the quarter Global Solutions rotated more heavily into metal recycling, which represents an important part of the circular economy with important drivers connected to increasing digitalization and a green transition.
- Net Zero ambitions will boost mineral demand by as much as six times, and recycling represents an avenue to decrease reliance on mining.
- In order to unlock higher recycling rates, the integration of Artificial Intelligence in identification and sorting remains an interesting crossover topic.
- A changing regulatory environment pushing ambitious green transition plans in Europe remains underappreciated and should represent an improving end market for renewable energy companies going forward.
