Definitions:

- 1) Net interest income as percent of average total assets. Average total assets is calculated on the basis of monthly total assets.
- 2) Other operating income includes net fee and commission income.
- 3) Total operating expenses as % of total income.
- 4) Loan losses and provisions consists of total loan loss provisions including change in statistical provisions for the period.
- 5) Liquidity coverage requirement.

Annual report

Main trends

Storebrand Bank ASA is a wholly owned subsidiary of Storebrand ASA. The bank's operations are conducted as an integrated part of the Storebrand Group's operations, and are organised under the retail market. Storebrand Bank ASA is a commercial bank with licences pursuant to the Securities Trading Act. The bank's head office is located at Lysaker in Bærum municipality.

Storebrand Bank ASA offers a wide range of banking and savings products to the Norwegian retail market, as well as a limited daily banking offering to small and medium-sized businesses. The bank is positioned as a digital bank with a personal touch, and offers personal advice based on the mortgage. The bank is looking for customers who value breadth, and see the bank relationship as the gateway to having their financial needs met. Based on the retail strategy, the bank can ensure that the customer's needs are met in both banking, savings, pensions and insurance. Through its products and services, the bank wants to promote sustainable choices among its customers, including through the environmental measure loan, where customers can get combined good advice on energy efficiency through the bank's partner Huseierne, as well as favourable financing. The bank also offers investment advice to the affluent segment.

Storebrand Bank ASA has a wholly owned subsidiary, Storebrand Boligkreditt AS, which is a mortgage credit institution licensed by the Financial Supervisory Authority of Norway to issue covered bonds. In 2024, the savings company Kron AS was merged into the bank, and the bank now offers market-leading digital solutions for fund savings. The strategy going forward will be to ensure that all bank customers benefit from these solutions, while at the same time developing the online and mobile banking solutions.

Macroeconomic impact

Continued high inflation, a weak Norwegian krone and a generally good Norwegian economy have meant that Norges Bank has kept the key policy rate unchanged throughout 2024. However, inflation has fallen throughout the year and central banks in the US, Europe and Sweden are well on their way to cutting interest rates. The first policy rate cuts are now expected in 2025. Many Norwegians, including our customers, have for several years had greater challenges dealing with higher prices and higher loan rates, but a good labour market and low unemployment have contributed to the fact that the personal financial situation has nevertheless been manageable for the vast majority. The housing market in 2024 has been surprisingly good, with price growth and high turnover in the second-hand housing market. At the same time, there has been little supply of new homes. Into 2025, the housing market is expected to remain strong, driven by announced interest rate cuts, few new homes on the market, good wage settlements and low unemployment.

In the impairment assessments, an overall assessment of the future outlook is made, where interest rates, inflation and unemployment are some of the factors considered. Developments in non-performing loans, loans with arrears and interest-only periods are closely monitored.

Financial performance

Trends in profit before tax (NOK Million)

Profit before tax for the banking group was NOK 663 million for 2024, compared with NOK 500 million in 2023. Net interest income increased by NOK 257 million in 2024 to NOK 1,174 million, as a result of both increased assets under management and improved margins. Operating expenses increased from NOK 458 million in 2023 to NOK 562 million in 2024. Loan losses amounted to NOK 59 million in 2024, compared with NOK 54 million in 2023. The banking group achieved a profit after tax of NOK 505 million in 2024, compared with NOK 380 million in 2023.

Net interest income

Net interest income (NOK Million) and net interest income as a percentage of average total assets

Net interest income for the banking group was NOK 1,174 million in 2024, compared with NOK 917 million the year before. The increase is due to both increased total assets and improved interest margins. Net interest income as a percentage of average total assets amounted to 1.57 per cent in 2024, an increase of 0.14 percentage points from 2023. From 2023 to 2024, margins on lending have increased somewhat, while deposit margins have weakened somewhat from a high level. Strong growth in customer deposits, and thus an improvement in the bank's deposit/loan ratio, has had a positive effect on the bank's interest margin in 2024.

Net commission income

The banking group's net commission income amounts to NOK 96 million, compared with NOK 96 million in 2023.

Other income

Net gains/losses on financial instruments improved from minus NOK 2 million in 2023 to NOK 1 million in 2024. There are fewer losses on financial instruments in 2024 than in the previous year. NOK 7 million has been recognised as income from management fees from Kron. For the banking group, this is Kron's income in the fourth quarter.

Operating expenses

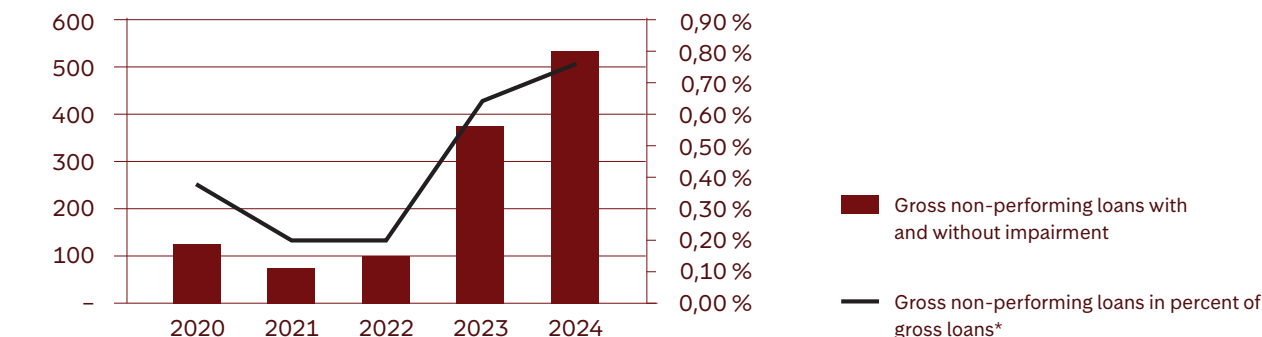

Operating expenses (NOK Million)

The banking group's operating expenses totalled NOK 562 million (458 million). The cost-to-income ratio was 44 per cent in 2024 (45 per cent). The increase is mainly due to increased resource use in AML, increased resource use in Operations related to strong growth and somewhat increased staffing in sales. At the same time, Kron AS has merged with the bank, and for the banking group, this results in a cost increase of NOK 24 million compared to 2023.

Losses and non-performing loans

Developments in gross non-performing loans with and without impairment (NOK Million) and int the percentage of average gross lending

* Defaults measured at account level

Total loan losses amounted to NOK 59 million for the banking group in 2024, compared with NOK 54 million in 2023. Losses related to mortgages make up the majority of loss costs and losses now account for 0.05% of the average mortgage portfolio.

Non-performing loans without impairment increased in 2024 and amounted to NOK 293 million (267 million), while non-performing loans with impairment amounted to NOK 241 million (112 million). The total volume of defaults is 0.8 per cent of gross lending (0.6 per cent).

Balance sheet

Development in gross lending by banking group and Storebrand Life Insurance (MNOK)

At the end of 2024, the banking group had total assets of NOK 80 billion. Gross lending to customers was NOK 69 billion at year-end, an increase of NOK 9.3 billion from 2023. The portfolio of residential mortgages in Storebrand Livsforsikring AS has been marginally changed in 2024 and amounts to NOK 17.5 billion as of 31 December 2024. The loan portfolio, including loans managed on behalf of Storebrand Livsforsikring AS, thus amounted to NOK 86.5 billion at the end of the year, which implies a total increase of NOK 9.8 billion from the beginning of the year.

The banking group's lending portfolio consists mainly of low-risk residential mortgages. The average weighted loan-to-value ratio for the banking group's residential mortgage portfolio is 62 per cent, compared with 65 per cent at the end of 2023. The loan-to-value ratio is calculated on the basis of the amount deducted from credits.

The banking group has a balanced funding structure and bases its borrowing on customer deposits, issuance of securities and covered bonds, as well as borrowing in the Norwegian and international capital markets. The Bank has established good liquidity buffers. The volume of deposits from customers was NOK 31.4 billion (23.9 billion) at the end of the year, corresponding to a deposit/loan ratio of 46 per cent (40 per cent).

The banking group has issued NOK 0.8 billion in senior bonds, NOK 0.7 billion in covered bonds and NOK 4.9 billion in increases on existing covered bonds during 2024. At year-end, Storebrand Bank ASA held NOK 37.3 billion in covered bonds issued by Storebrand Boligkreditt AS.

Business segments

Storebrand Bank ASA supplies traditional banking products to the Norwegian retail market. The offer includes loans for housing, consumer loans, current accounts and cards, as well as mobile banking and online banking. The bank collaborates with several external partners, including the real estate chain Nordvik and the interest group Huseierne. Storebrand Bank ASA also offers a wide range of options for bank savings, and is the headquarters for the Group's investment advisory business towards the retail market. In 2024, the savings company Kron AS was merged into the bank and the bank now offers market-leading digital solutions for fund savings.

At year-end 2024, the banking group had approximately 120,000 active customers with a gross lending volume of NOK 69.0 billion and deposit volume of NOK 31.4 billion.

Group structure and subsidiaries

The subsidiary Storebrand Boligkreditt AS has a licence to issue covered bonds secured on private homes. The company has a balance sheet of NOK 47.8 billion (NOK 46.6 billion) at the end of 2024 and mainly functions as a financing tool. The relatively low growth in the company in 2024 is due to the bank's growth in customer deposits, which in turn has financed much of the bank's lending growth. Covered bonds have been issued for NOK 37.4 billion. The volume of non-performing and loss-exposed loans amounted to 0.65 per cent of gross lending at the end of 2024. The established loan program has a AAA rating from the rating agency S&P Global Rating Services.

Risk management

A bank's core business is related to value creation through exposure to acceptable risk. The banking group is aware of the risks in its operations, has a good understanding of risks that result in earnings and losses and works continuously to further develop systems and processes for risk management. The risk profile is assessed as low to moderate.

The risk in the bank group is closely monitored in accordance with guidelines for risk management and internal control that have been approved by the Board. The board sets an annual risk appetite and strategy and risk limits. Separate risk strategies are drawn up for the individual risks, with risk indicators and risk limits. Development of these parameters is followed through risk reports to the Board.

Credit risk and liquidity risk are the most important risks for the banking group. The Bank is also exposed to solvency risk, market risk, operational risk incl. ICT risk, and compliance risk.

Credit risk

The banking group has net lending to customers of NOK 68.9 billion on 31 December 2024. Total exposure as of 31 December 2024 also includes loan commitments, unused credit limits and guarantees totalling NOK 8.2 billion.

The lending volume, including loan commitments and unused credit facilities, amounts to NOK 76.7 billion. The credit quality of the portfolio carries low to moderate risk, in line with risk appetite. Almost the entire portfolio is secured on real estate. The portfolio's high security coverage indicates limited risk of losses. New loans are granted in accordance with the regulation relating to new loans secured by a mortgage on residential property.

The average weighted LTV ratio in the banking group is about 62 percent (65 percent) for residential mortgage exposures. Among home loan exposures, 44 percent (39 percent) are within 60 percent LTV ratios, 79 percent (73 percent) within 80 percent and 99.7 percent (99 percent) are within 100 percent LTV ratios. Storebrand Bank ASA monitors LTV ratios on an ongoing basis and updates market values quarterly.

Exposure in credit lines secured on residential property accounts for 24 per cent (18 per cent) of total exposure. The utilisation rate of the credit lines is on average 72 per cent (70 per cent).

At year-end, the banking group had deposited securities with a fair value of NOK 4.438 million as collateral for overdraft access to overnight loans in Norges Bank. Securities with a fair value of NOK 101 million have also been deposited with other credit institutions.

Cash flow and liquidity risk

The Storebrand Bank Group has solid liquidity buffers. The liquidity coverage requirement (LCR) measures the size of the enterprise's liquid assets, relative to net liquidity outflows 30 days ahead, in a given stress situation in money and capital markets. The minimum LCR requirement is 100 percent. The Bank reports the LCR monthly. The LCR requirement is satisfied at all measurement points. At the end of the year, the banking group's LCR amounted to 241 per cent. In Storebrand Boligkreditt, the over-collateralisation is 23.5 per cent (32.3 per cent), where the legal requirement is 5 per cent (covered bond premium). Storebrand Bank ASA also has a substantial volume of bank balance that can be sold to the mortgage company. The Bank thus has a great potential for issuing covered bonds.

The deposit/loan ratio in the Storebrand Bank Group was 46 per cent at the end of the year. With regard to wholesale funding, there is considerable emphasis on having a balanced financing structure with regard to maturity dates, instruments and issues in different markets. The Storebrand Bank Group measures and assesses, among other things,

Finanstilsynet's liquidity indicator 1 and NSFR in its assessment of the bank's funding. The minimum requirement for the NSFR is 100%. The banking group's NSFR was 129 per cent at the end of 2024.

Net cash flow from operating activities mainly consists of incoming payments and disbursements in the form of interest, commissions, fees and loans from customers, net payments/disbursements on the sale of investment assets and administrative expenses. Net cash flow from investment activities mainly consists of net payments/disbursements and interest related to the issuance of securities as well as the purchase and sale of fixed assets and intangible assets. Cash flows from financing activities relate to group contributions and capital injections. Net cash flow for the Storebrand Bank Group for the year 2024 was positive by NOK 1,643 million.

Market risk

Interest rate risk and spread risk in the liquidity portfolio constitute the most significant market risks. Overall, market risk is low. There are very low limits on currency risk, and there is no active investment strategy for equities. The bank has no trading portfolio.

Operational risk

In order to manage operational risk, the banking group focuses on establishing good work and control routines, and at the same time works systematically to create good attitudes among the banking group's employees. The most important measures to reduce operational risk are systematic risk reviews in all parts of the banking group at least semi-annually, as well as when initiating projects and if special events occur. The last risk review was conducted in the second half of 2024. Operational risk is considered low.

The bank's IT systems are central to, among other things, product establishment, credit granting, portfolio follow-up and accounting. Faults and business interruptions can have consequences for operations and affect customer confidence. Ultimately, nonconformity situations can lead to sanctions from supervisory authorities. Operational operation of the IT systems is to a considerable extent outsourced. The bank's system platform is based on purchased standard systems that are operated and followed up through service agreements. A cross-cutting management model has been established with close supplier follow-up and internal control activities to reduce the risk associated with the development, management, operation and information security of IT systems. The IT platform is stable and works well.

Compliance risk

The risk of incurring public sanctions or financial loss as a result of non-compliance with external and internal regulations is defined as the banking group's compliance risk. Storebrand Bank ASA pays particular attention to risks associated with compliance with and implementation of amendments to applicable anti-money laundering and terrorist financing (AML-CFT) legislation, customer protection/protection, capital adequacy, liquidity management and application of international accounting standards.

Fraud and disputes

Storebrand Bank ASA has reported two (three) fraud cases to the police in 2024. In total, the bank has received 86 (34) customer complaints in 2024. The customers have been upheld in 26 (11) cases, partly upheld in 11 (1) cases, 34 cases are still in process and the remaining 29 complaints have been rejected (6). The complaints have resulted in loss recognition totalling NOK 0.4 million.

Capital management

Capital adequacy

At the end of 2024, the banking group has a net primary capital of NOK 6.3 billion (NOK 5.4 billion). The capital adequacy ratio, core capital ratio and pure core capital (CET1) ratios were 22.1 per cent, 19.2 per cent and 18.0 per cent respectively at year-end 2024, compared to 21.8 per cent, 18.5 per cent and 17.0 per cent at the end of 2023. The unweighted core capital ratio amounted to 6.7 per cent at the end of 2024, compared with 6.3 per cent at the end of 2023. The bank group and Storebrand Bank ASA must always comply with the capital requirements with an adequate margin. The total requirement for pure core capital (CET1), core capital and primary capital is 14.7, 16.5 and 18.8 per cent respectively. The requirement for the unweighted core capital ratio is 3 percent. The company has satisfactory financial strength and liquidity in relation to its business activities. The banking group, the parent bank and the mortgage credit institution all comply with applicable legal requirements.

The Transparency Act

Purpose and delimitation

Storebrand Bank ASA is obliged to conduct due diligence in accordance with the OECD Guidelines for Multinational Enterprises and Work on Fundamental Human Rights and Decent Working Conditions (the Transparency Act) on 01.07.2022 to conduct due diligence in accordance with the OECD Guidelines for Multinational Enterprises.

Storebrand Bank ASA will comply with universal human and labour rights, and minimise the risk of breaches through our own operations and supply chain. By own operations is meant influence through financial services offered and treatment of own employees.

The purpose of this report is to make it easier for consumers, organisations and other stakeholders to gain insight into how Storebrand Bank ASA works with human and employee rights, and whether we have either caused, contributed to or are directly associated with violations of these.

In addition to this report, reference is made to the Storebrand Group's annual report and joint report pursuant to the Transparency Act. In Chapter 3, the latter describes group-wide guidelines that form the basis for the work on human rights in Storebrand Bank ASA.

Organisation

Group organisation

Responsible parties have been identified in each group company to ensure that risk assessments are regularly carried out and due diligence assessments are carried out of the supply chain and business partners, as well as their own operations. Reference is made to the Storebrand Group's annual report and joint report pursuant to chapter 2 of the Transparency Act for more information about the Group's organisation.

Organisation and responsibility

Storebrand Bank ASA is a wholly owned subsidiary of Storebrand ASA, and is a commercial bank with licences under the Securities Trading Act. Storebrand Bank offers traditional banking products, such as mortgages, account products, payment services and unsecured loans to the Norwegian retail market. The bank also offers investment advice and order communication to retail customers and companies, primarily in Norway, as distributor for the product companies Storebrand Asset Management AS and Storebrand Livsforsikring AS. In 2024, the savings company Kron AS was merged into the bank, and the bank now offers market-leading digital solutions for fund savings.

The CEO of Storebrand Bank ASA is responsible for implementing the work on human rights and decent working conditions in the company. The management team at Storebrand Bank handles risk and due diligence assessments of the supply chain and business partners, as well as operations within respective areas of responsibility and functions. The Chief Risk Officer (CRO) and Chief Compliance Officer (CCO) of Storebrand Bank provide ongoing advice and monitor assessments and processes related to human rights and decent working conditions. The Bank also involves key group-wide specialist communities for assistance related to the procurement process, risk assessments, as well as legal and technical issues and requirements, in connection with procurement and entering into new agreements.

A common framework for compliance with the Transparency Act has been established, and Storebrand Bank follows established guidelines and procedures. The Group also has established systems for complaints and whistleblowing. Employees can notify both internally and externally via a third-party channel, and it is possible to submit a complaint from Storebrand's website or by contacting the customer center.

Supplier relationship

Storebrand has group-wide suppliers within IT and ICT operations, office services and cleaning, accounting and financial services and consultancy services. For a general description of the Storebrand Group's suppliers, see section 4 of the Storebrand Group's annual report and joint statement pursuant to the Transparency Act.

For key system and service deliveries, Storebrand Bank mainly uses large Nordic suppliers, which are established and well-known players in the banking sector in Norway. The deliveries include customer systems, online and mobile banking, system support for advice, payment infrastructure, card services and debt collection services. The bank also buys certain technology services from companies headquartered in the UK and the US. Storebrand Bank has also outsourced certain business processes to a British company with international operations. These services are provided from the company's office in Lithuania.

Storebrand Bank works closely with the major suppliers, and has established follow-up processes for all suppliers, which, through risk and due diligence assessments, ensure that the bank's expectations and requirements relating to human rights and decent working conditions are met.

Guidelines

Storebrand wishes to be open and transparent about its work within human and labour rights. Therefore, we have a high degree of publicly available guidelines and documents. For an overview of governing documents and guidelines, see chapter 3 of the Storebrand Group's annual report and joint statement pursuant to the Transparency Act. These include all group companies.

Risk and due diligence assessments

Storebrand Bank assesses the risk of human rights violations and decent working conditions through the use of suppliers and their subcontractors and through the distribution of financial services. The following presents the most significant risk areas for Storebrand Bank and associated mitigating measures.

The total risk level for Storebrand Bank is considered low. In addition to Group-wide risks, which are described in more detail in the Storebrand Group's annual report and joint statement pursuant to the Transparency Act under Chapter 4, there is an inherent risk in Storebrand Bank that follows from the choice to be a digital bank. Customers get access to information, buy and change products, and perform their own banking and savings services on digital platforms such as mobile and online banking, investment apps and the bank's website. There is a certain risk that customers with limited digital capabilities find it challenging to relate to the bank's digital services. To meet this risk and be a publicly accessible bank, the bank has the option of communicating over the phone and through digital platforms. In connection with taking out a mortgage and investments, there will always be an advisor available.

Storebrand Bank also has a strong focus on striving for equal treatment and advice to customers, without any form of discrimination based on background. An important measure for this is transparent and easily accessible information about contract terms, and openness about the implications for the customer in connection with taking out loans and purchasing savings products.

Methodology

The assessments are based on the extent to which the rights enshrined in the rights declarations below and the conventions are threatened, and what kind of consequences and harm a breach will entail.

- Universal Declaration of Human Rights (UDHR)
- International Covenant on Civil and Political Rights (ICCPR)
- International Covenant on Economic, Social and Cultural Rights (ICESCR)
- United Nations Convention on the Elimination of All Forms of Discrimination against Women (CEDAW)
- United Nations Convention on the Rights of the Child (CRC)
- The Fundamental Rights of the International Labour Organisation (ILO)

For a detailed description of the framework, see the Storebrand Group's report published in June 2023, chapter 6.

Sustainability

The Storebrand Bank Group offers pensions, savings products, insurance and banking products to personal customers, business customers and public enterprises. Storebrand Bank ASA strive to be closest to the customer and know them so well that we can always help them with what they need. Storebrand offer products and services that will give our customers increased financial security and freedom. The goal is to make it easier for customers to invest in the future by making good financial choices today. Our purpose clearly and simply states what is most important to us: Creating a future to look forward to.

The Corporate Sustainability Reporting Directive (CSRD) was introduced into Norwegian law in 2024 and expands the reporting requirements in the current sections 2-9 of the Accounting Act. Sustainability information must be provided in the annual report and will to a greater extent be equated with financial information. The CSRD contains the European Sustainability Reporting Standards (ESRS) issued by the European Financial Reporting Advisory Group (EFRAG). Storebrand Bank Group does not have an independent reporting obligation for 2024 in accordance with the CSRD as they fall outside the threshold values. The Storebrand Bank Group is included in the Storebrand Group's Sustainability Report, which has been prepared in accordance with (ESRS). The Storebrand Bank Group is expected to have an independent reporting obligation as of the 2025 financial year.

Sustainability is of great importance to the Group, the customers and the outside world, and we contribute to financial security and freedom through good management of the customers' funds, disbursement of life, disability and P&C insurances and financing of home purchases. We believe that good work with sustainability contributes to the Group being able to deliver the best possible risk-adjusted future return to customers and owners, and is therefore important to achieving the commercial goals.

Storebrand's corporate strategy is built around our purpose and vision of delivering financial security and freedom to individuals and businesses. We want to motivate customers to make good financial choices for the future. By offering sustainable solutions so that customers can have a future to look forward to, we create value for customers, owners and society.

Our work with sustainability is threefold:

- Storebrand as a social actor
- Sustainability in your own business
- Sustainability in products and services

Storebrand must take sustainability into account, both through our products and services and through our collaboration with suppliers and partners. In our work, we base ourselves on these principles:

- Through our operations, we shall contribute to achieving the UN's sustainability goals, as well as the associated national and international goals to which the authorities where we operate have committed themselves.
- We shall prioritise work with selected sustainability goals where we can have a significant influence - and which significantly influence us.
- We will help our customers to make more sustainable choices, through the products and services we offer.
- We are a responsible employer.
- We must take sustainability into account in all processes and decisions – from the boards and group management, who have overall responsibility, to every manager and employee.
- We collaborate with customers, suppliers, authorities and partners in our work with sustainability.
- We are open about our sustainability work and about the results we achieve.

Storebrand Bank ASA, as an integral part of the Storebrand Group, has the same principles for working with sustainability as the Group as a whole.

The Storebrand Group is open about our sustainability work and reports in accordance with several leading reporting standards, including the CSRD, Task Force on Climate-Related Financial Disclosures (TCFD) and CDP (formerly the Carbon Disclosure Project), in line with the expectations of key stakeholders. Strategic ambitions, specific goals, reporting and communication about sustainability are important success criteria in our work. In addition, we engage in national initiatives such as Skift Næringslivet's climate leaders and international initiatives such as the Net Zero Asset Owner Alliance, Net Zero Asset Manager Alliance, UN Principles for Responsible Investments (PRI) and Climate Action 100+ to collaborate with other like-minded actors to find solutions to global sustainability challenges and set requirements for achieving zero-emission goals.

Sustainable finance

Storebrand actively participates in the public debate and has a dialogue with the authorities, in order to speed up and improve the transition and the conditions for us to contribute to the transition as an investor, insurance player and lender.

Climate and environment

Storebrand's biggest impact on climate change comes from financed emissions through our investments. Because we are a significant asset owner with global positions, we see climate change as one of the areas where we can indirectly contribute positively or negatively to society - and this can affect us negatively. In order to reduce the negative impact on climate change, we have defined science-based and verified targets for investments and our own operations. Storebrand's overall ambition is to contribute to achieving the Paris Agreement.

We have set targets for 2030 for our own operations that focus on reducing our greenhouse gas emissions through measures in energy, waste, air travel and procurement. We have the following science-based goals. These have been verified by the Science Based Targets Initiative.

- Storebrand is committed to reduce absolute emissions (scope 1-2) by 52 per cent by 2030, with 2018 as the base year
- Storebrand commits to continue with annual purchases of 100% renewable electricity until 2030 ¹⁾.

For waste, we have a goal of an 80% sorting rate by 2030 and are working on measures to reduce the amount of waste and increase the proportion of waste that is sorted at source in our offices. We will reduce absolute Scope 3 greenhouse gas emissions from air travel in the period 2019-2030 by 40% by a combination of reduced travel and the purchase of biofuels. We will have an overall carbon framework for the period that is distributed among the various business units. An updated travel policy was launched in 2024 to clarify Storebrand's approach to travel. Travel must be followed up regularly by managers. The Group uses a tool that displays flights and emissions data to follow the organisation's status for the target. An internal CO2 tax per tonne of CO2e emissions is charged to the departments when purchasing flights, and the money from the tax is used to purchase carbon credits and other compensatory activities. In procurement, our ambition is for suppliers to reach net-zero emissions from their operations by 2050. Our goal is that at least 80% of our suppliers with an annual turnover at contract level above NOK 5 million sign a commitment to either set science-based targets in line with relevant industry standards, or document that significant parts of the company's deliveries to Storebrand contribute to our strategy of increased reuse and repair. Circular measures could be recycling of materials, reuse, repair and rehabilitation/improvement rather than the use of new materials. The supplier must report annually on the status, progress and measures taken to achieve the ambitions. We annually follow up progress on the commitments for suppliers with a turnover with us above NOK 10 million. Towards 2030, the ambition is to increase follow-up to suppliers with a turnover of more than NOK 5 million. The follow-up takes the form of surveys, analysis of these and subsequent dialogue with the suppliers. Suppliers with lower turnover at Storebrand are checked through annual spot checks.

1) We have used a location-based method for our scope 1-2 emission targets for our own operations, but also included a market-based target for the procurement of renewable electricity.

Priority will be given to financing and raising capital for the Group through the issuance of bonds, including green bonds and sustainability-linked bonds. The Group's framework for green bonds is being considered to be updated, as well as the establishment of a framework for sustainability-linked bonds.

Storebrand has committed to an investment portfolio with net zero greenhouse gas emissions by 2050. Storebrand has its own climate policy for investments that sets the framework for this goal. We expect companies to address the effect their operations have on the climate, in terms of both risks and opportunities. We prioritise work with the companies in the portfolio with the most significant emissions across scope 1-3, as well as the companies with the highest climate risk. In order to realise the overall goal, several sub-goals have been established for investments:

- 60 per cent reduction of scope 1-2 market-based emission intensity ²⁾
- 20 percent of invested funds in "solutions ³⁾" by 2030
- Dialogue and special follow-up of the 20 largest emitters up to and including 2025 and the 30-50 largest from 2026-2030

We also have the following science-based targets for the investments that have been verified by the Science Based Targets Initiative:

- 42 per cent of listed shares and corporate bonds (based on invested funds) must have defined validated, science-based targets (SBTi) by 2027
- 64 per cent reduction of scope 1-2 market-based emission intensity (kgCO₂e per m²) from residential buildings 2019-2030 ⁴⁾
- 71 per cent reduction of scope 1-2 market-based emission intensity (kgCO₂e per m²) from commercial buildings 2019-2030

Storebrand's work with climate is described in more detail in the chapter *Climate changes* in Storebrand's annual report.

Key Intangible Resources

Storebrand has identified several intangible assets that are crucial for our competitiveness, value creation and future development. The most important intangible assets are our competent employees who have specialised expertise in our business areas, good technological solutions, long-term relationships with customers and a strong brand. These resources help strengthen our market position, increase operational efficiency and improve the customer experience.

Own employees

Storebrand has a significant influence on employee well-being, although the scope of the influence is largely limited to Storebrand's internal conditions. Storebrand's employees are our most important source of innovation, development and growth. We need employees who are courageous pioneers, who challenge and think creatively to contribute to financial security and freedom for our customers. Working with ethics, social responsibility and sustainability form an important value base for our business. Our People strategy aims to create a balance between value creation from a customer and employee perspective, a profitability perspective and a sustainability perspective. We will develop an organisation that works every day to ensure that our customers have a future to look forward to. We do this by delivering financial security and freedom through knowledge sharing and advice, in addition to financial products and services. Our customers must experience that we have both competence and commitment to what we do. Our work with sustainability also contributes to attracting motivated talent and strengthening the Storebrand brand among current and future employees. We were early on in seeing artificial intelligence (AI) as an important part of our strategy.

To ensure continuous improvement, we use the 4-step model from the activity and reporting duty: mapping challenges, analysing causes, setting targeted measures and evaluating results. All measures are evaluated against specific goals with a clearly defined baseline and comparison with industry standards. See more about this in the report on the Activity and Reporting Duty. ⁵⁾

Employee surveys showed that the high degree of dedication among our employees remained in 2024.

In 2024, we continued to facilitate customised skills development for all our employees, based on dialogue with each individual. Planning for needed future skills can give Storebrand a competitive advantage that can lead to increased profits. Our work with diversity and equal opportunities can provide an indirect financial gain as a result of external attention and a good reputation. We always strive to be an organisation characterised by inclusion and belonging. All Storebrand employees must be treated equally, regardless of age, gender, disability, cultural background, religious belief or sexual orientation, both in recruitment processes and throughout the entire employment relationship. We have zero tolerance for harassment and discrimination.

2) Calculated as Weighted Average Carbon Intensity.

3) Solutions are defined as shares in solution companies, green bonds, green real estate and green infrastructure.

4) Market-based methodology is used, but the priority will be to decarbonise managed properties through direct interventions in energy reduction and on-site renewable energy production, and ultimately to procure renewable energy in the market

5) <https://www.storebrand.no/en/sustainability/sustainability-library>

In 2024, 43 percent of the company's board members were women. There are 30 percent of women with managerial responsibilities in the company.

Storebrand's long-term ambition is to ensure a safe and secure working environment for all employees, both physically and mentally, as well as to protect the environment in which we operate. Storebrand has a high standard for this and works systematically with measures to prevent the risk of injuries, protect our employees and further develop a good and safe working environment. Among the Group's most important goals for this work are a stable and low sickness absence rate of less than 3.5 per cent and zero physical injuries. Sickness absence among employees at Storebrand Bank ASA was 2.8 per cent in 2024, up from 2.2 per cent in 2023. At Storebrand Day, which is held annually for all employees, we focused in 2024 on resilience, to strengthen our mental skills together and prepare for challenges.

Storebrand had none accidents that resulted in personal injury in 2024. There have been no cases of material damage.

Storebrand's work with equality, personnel management, working environment and ethical regulations are described in more detail in the chapters *Own employees* and *Business management and compliance* in Storebrand's annual report as well as its own report on equality and discrimination which is available in Storebrand's sustainability library on our website⁶⁾.

Customers and end users

We offer long-term savings and insurance products that help individuals and companies achieve financial security and freedom. This is how we can influence society in a positive way. Storebrand's ability to deliver financial security and freedom is crucial to attracting customers. When customers take action to secure their financial future with Storebrand, they should feel confident that they have made good choices. Customers should feel that we offer relevant and good products.

The principle "customer first" is the starting point for all customer contact. This is reflected in our service standards:

Credible – I keep my promises and I am professional

Care – I treat everyone individually, help them and provide advice

Enthusiastic – I am positive and exceed expectations

Effective – I make the customer journey easy and improve the organisation

We want to increase the number of satisfied and loyal customers through good, digital customer experiences. The interaction between digital services and automated processes is the key to efficient distribution and service, and a prerequisite for a profitable and forward-looking Storebrand in the years to come. Through investments in technology and defined digitization programs in each business area, we ensure competitiveness in the market.

Storebrand's work with customer relations is described in more detail in the chapter *Customers and end users* in Storebrand's annual report.

Corporate governance and compliance

In order to build and preserve the trust our customers, shareholders, authorities and the rest of society have in us, we are aware of how mechanisms for management and control contribute to shaping the business culture at Storebrand. This is both about the values we promote, how each individual employee behaves and how we facilitate compliance with internal and external regulations. Our culture affects, among other things, how we interact, make decisions and how we behave in everyday work. All employees must take compulsory courses in sustainability, ethics, anti-corruption, privacy, information security, money laundering and terrorist financing and sustainability every year.

We have an approach of working purposefully to develop employees' skills, identify risks and opportunities, and develop our internal regulations. This helps to build a culture of open communication, trust and respect, while promoting diversity and inclusion, learning and accountability. Storebrand works actively to build and preserve an open business culture.

Privacy and digital trust

The digital development creates an increasing risk that personal data can go astray, be stolen or shared with unauthorised persons. The customers and our employees must be able to trust that we manage their personal data in a responsible manner. It requires that we have good security measures, a well-established framework for personal protection and good compliance with this. In addition, our employees must know how personal data must be handled properly in their daily work, and in general in our business.

Work against money laundering and terrorist financing

Storebrand must act consistently and in accordance with relevant legislation in matters relating to money laundering, terrorist financing and other financial crimes, and avoid our companies being misused for such purposes. This requires systematic and continuous work. We seek to achieve this through good routines, training and ongoing follow-up of our customers and partners.

6) <https://www.storebrand.no/en/sustainability/sustainability-library>

Work against corruption

At Storebrand, we have zero tolerance for corruption and other financial fraud. Corruption can lead to economic instability and is punishable in all countries where Storebrand operates. The trust our customers and the wider world have in us, but also in the financial industry in general, will be negatively affected by a possible corruption case. It is therefore important for us to help promote ethics, active ownership and accountability because it helps to fight corruption. We continuously work to identify internal areas with a high risk of corruption. We also have a number of measures to prevent fraud.

Information security

As a financial institution, our digital solutions and our infrastructure are critical for society. We manage large amounts of information and assets for our customers. We can be an attractive target for a number of threat actors because of our market position, our customers, suppliers, partners and employees. We work with information security by seeing people, processes and technology as a whole. In order for Storebrand to be able to run a good financial business and increase our innovation power in the years to come, secure and stable IT solutions and infrastructure are a prerequisite. We therefore work continuously and strategically with information security to manage risk and to strengthen our resilience.

A responsible value chain

Procurement is an area where we can influence our suppliers in a more responsible direction. In our business, we have a significant proportion of outsourcing. This requires stricter procedures for monitoring working conditions, safeguarding human rights and handling environmental impacts in the value chain. A key objective is to avoid agreements with suppliers where production processes or products violate international agreements, national legislation or internal guidelines. Through our own operations and purchasing operations, we must contribute to sustainable development, and to ensure that human rights and workers' rights are not violated. Since 2020, we have set ambitious climate requirements for our suppliers. In 2023, we adjusted these requirements. We maintain high ambitions, while the requirements encourage suppliers to a greater extent to take concrete measures in their own operations rather than buying climate quotas in their work towards net zero, as well as reducing the risk of greenwashing. Our updated concrete targets mean that by 2050 the suppliers will achieve net zero greenhouse gas emissions from their operations through:

1. Measure and report the emissions of greenhouse gases from the business
2. By the end of 2025, set science-based climate targets in line with the relevant industry standard to reduce greenhouse gas emissions
3. Reduce emissions as much as possible through own actions and introduce appropriate measures to compensate for own emissions that cannot be avoided

Insurance for board members and company management

The Board of Directors and senior executives are covered by the company's ongoing board liability insurance. This is placed with insurers with a solid rating. The insurer will, within the limits of the insurance coverage, compensate for asset losses resulting from claims made against the insured for personal management liability during the insurance period.

Corporate governance and compliance

The banking group's systems for internal control and risk management in connection with the accounting process comply with the Storebrand Group's guidelines. The guidelines are decided by the board annually. In addition, the banking group purchases, through signed service agreements, services related to accounting and financial reporting from Storebrand Livsforsikring AS.

The management and board of directors of Storebrand ASA review the principles of corporate governance on an annual basis. In accordance with Section 2-9 of the Accounting Act and the Norwegian Code of Practice for Corporate Governance published by the Norwegian Corporate Governance Committee (NUES) (which was most recently revised on 14 October 2021), Storebrand provides an account of the principles and practices for corporate governance. For a more detailed account of Storebrand's corporate governance and corporate governance as well as corporate governance pursuant to Section 2-9 of the Accounting Act and the CSRD, please refer to the chapter **Corporate Governance** in the Storebrand Group's annual report for 2024.

The banking group publishes four quarterly accounts in addition to the ordinary annual accounts. The accounts shall satisfy the requirements of laws and regulations and shall be prepared in accordance with adopted accounting principles and follow deadlines set by the Board of Directors of Storebrand ASA. The bank's accounts are prepared by the Consolidated Accounts department of Storebrand Livsforsikring AS, which is organised under the Storebrand Group's CFO. Key managers in the Consolidated Financial Statements receive fixed annual compensation that is not affected by the Group's accounting results. A number of risk assessment and control measures have been established in connection with the presentation of the accounts. Internal meetings, as well as meetings attended by the external auditor, are held to identify risk factors and measures related to material accounting items or other matters. Corresponding quarterly meetings are also held with various specialist communities in the Group, which are key in connection with the assessment and valuation of loans, financial instruments and other valuation items. In these meetings, particular focus is placed on any market changes, specific factors related to default trends, individual loans and individual investments, transactions and operational factors, etc. Assessments related to significant accounting items, as well as any changes in

principles, etc., are described in a separate document (Assessment postnote). The external auditor participates in board meetings when considering the annual accounts and in meetings of the audit committee of Storebrand ASA. Monthly and quarterly operating reports are prepared where results per business area and product area are analysed and assessed against established budgets. The operational reporting is reconciled with other financial reporting. In addition, there are regular reconciliations of professional systems etc. with the accounting system.

The Board's working method is regulated in separate instructions for the Board. The articles of association stipulate that between five and nine members are elected by the general meeting. Up to two members are elected by and from among the employees. The members of the board are elected for one year at a time. The Board of Directors of Storebrand ASA has also established an overall "*Management document Management and control in the Storebrand Group*" as well as instructions for subsidiary boards. These documents describe how guidelines, plans and strategies adopted by the Group Board are expected to be followed, and how risk management and control shall be implemented in the Group. The Board of Directors of Storebrand ASA has four advisory and preparatory working committees: the Strategy Committee, the Compensation Committee, the Audit Committee and the Risk Committee. The remuneration committee, the audit committee and the risk committee meet the requirements set for working committees in subsidiaries.

The Bank has no provisions in its articles of association and authorisations that allow the board to decide that the enterprise shall buy back or issue its own shares or equity certificates. Guidelines for gender equality and diversity, including objectives, implementation and effect, are discussed in the section "*Own employees*" in the earlier annual report.

Changes in the composition of the board

Cecilie Joramo Sandell is new to the board from 4 June 2024 and replaces Maria Skotnes as employee representative. Odd Arild Grefstad is the new chair of the board from 1 January 2025 and replaces Heidi Skaaret.

Going concern

The Board confirms that the going concern assumption exists, and the annual accounts have been prepared under this assumption.

Events after the balance sheet date

As part of ordinary operations, the Storebrand Bank Group is continuously involved in litigation and dispute cases. The Board of Directors is not aware that events have occurred after the date of the balance sheet that have a material impact on the annual and consolidated accounts.

Strategy and outlook for 2025

2025 will be another year with relatively high uncertainty related to both geopolitical and macroeconomic conditions. There is a clear expectation that the Norwegian central bank will begin to reduce its key policy rate, but how quickly and how forcefully it will proceed is uncertain, and will of course be affected by what is happening around the world. After a period of very low interest rates during the pandemic, the last couple of years have been at higher levels, which has meant that many people have felt expensive. At the same time, house price levels have remained high, and activity is now back at normal levels.

Storebrand Bank ASA has experienced strong growth in recent years, both in lending and deposits. The level of ambition is also high going forward, and the merger with Kron means that the bank also has high ambitions in fund savings, where 2024 was a very strong year both in the market, but also net sales.

Efficient operations are the key to both scalable growth and good customer experiences, and the work to standardise, streamline and automate the bank's processes will continue uninterrupted into 2025. This includes further development of the new online and mobile bank, exploiting the potential of the CRM tool, Salesforce, as well as actively working with end-to-end automation and the use of artificial intelligence (including robots). Increasing customer satisfaction will continue to be a high priority, and will be operationalised through a number of measures across the bank's digital and physical value chains.

The Bank will prioritise maintaining a moderate to low risk profile with a good balance sheet and funding composition. Good management of the bank's credit and liquidity risk, and control of operational risk in key work processes, will continue to be key in 2025 as well. The Bank will further strengthen its close follow-up of the development of defaults and losses after a substantial increase in the last couple of years. Developments in Norwegian and international capital markets, interest rates, unemployment and the property market, particularly in Oslo, are considered to be the most significant risk factors that may affect the results of the Storebrand Bank Group in 2025.

Financial result for Storebrand Bank ASA

The annual profit for the parent bank, Storebrand Bank ASA, amounted to NOK 390 million (305 million) for 2024. Net interest income for Storebrand Bank ASA was NOK 677 million (591 million) for 2024. Net losses on loans amounted to NOK 53 million (44 million) for the year.

At the end of the year, the parent bank had total assets of NOK 45.9 billion (33.9 billion). Gross lending in the parent bank amounted to NOK 22.7 billion (14.6 billion). The parent bank's equity at the end of the year amounted to NOK 5.5 billion (4.4 billion). Net own funds after distributed group contribution amounted to NOK 6.0 billion (5.2 billion) at the end of the year. The company's capital adequacy ratio is 30.6 per cent (32.2 per cent) and the CET1 capital ratio is 24.6 per cent (25.0 per cent).

The banking group's operations, with the exception of those of Storebrand Boligkreditt AS, are conducted by the parent bank. Storebrand Boligkreditt AS is part of the Bank Group's retail market business area. Other profit and balance sheet developments for the parent bank are covered by the description for the banking group above.

Allocation of profit

Storebrand Bank ASA (the parent bank) achieved an annual result of NOK 390.2 million for 2024.

The Board proposes that NOK 200 million will be distributed in group contributions to Storebrand ASA, of which NOK 190.7 million is with tax effect and NOK 9.3 million is without tax effect. The Board considers the bank group and Storebrand Bank ASA's capital situation to be good given the risk profile and proposes the following allocation of the profit for the year to the bank's general meeting:

Amount in NOK million	
Group contribution after tax	-152.3
Transferred to other equity	-237.9
Total allocations	-390.2

Storebrand Bank ASA provides group contributions of NOK 185.4 million to the subsidiary Storebrand Boligkreditt AS without tax effect.

Lysaker, 11 February 2025

Total other income and expenses not to be classified to profit/loss						-0.2	-0.2	-0.2
Total other income and expenses that may be classified to profit/loss						1.2	1.2	1.2
Total other comprehensive income						1.0	1.0	1.0
Total comprehensive income for the period			30.0		30.0	475.7	475.7	505.7
Equity transactions with owners:								
Capital contributions	21.9	650.1			672.0			672.0
Additional Tier 1 capital classified as equity			-54.8		-54.8	7.5	7.5	-47.3
Payment to additional Tier 1 holders			-30.5		-30.5			-30.5
Group contribution received				297.0	297.0			297.0
Group contribution paid						-297.4	-297.4	-297.4
Equity at 31.12.2024	990.0	1,948.6	352.9	1,512.1	4,803.6	1,023.1	1,023.1	5,826.7

The equity changes with the result for the individual period, equity transactions with the owners and items that are entered directly to total comprehensive income. Share capital, the share premium reserve and other equity is evaluated and managed together. The share premium and other equity may be used in accordance with the provisions of the Public Limited Liabilities Company Act.

Storebrand Bank ASA actively manages the level of equity in the company and bank group. The capital level is tailored to the economic risk and capital requirements in which the composition of its business areas and their growth will be an important driver. The goal of the capital management is to ensure an effective capital structure and secure an appropriate balance between internal goals in relation to regulatory and the rating companies' requirements. If there is a need for new capital, this must be issued by the holding company Storebrand ASA.

Storebrand Bank ASA is a financial group subject to statutory requirements regarding primary capital under the capital adequacy regulations. Primary capital encompasses both equity and subordinated loan capital. For Storebrand Bank ASA, these legal requirements are most important in its capital management.

For further information on the group's fulfilment of the capital requirements, see note 36.

Statement of cash flow

Storebrand Bank Group

1 January – 31 December

NOK million	Note	2024	2023
<i>Cash flow from operating activities</i>			
Receipts of interest, commissions and fees from customers		3,989.9	2,987.2
Payments of interest, commissions and fees to customers		-1,036.3	-535.7

See note 34 for information about undrawn credit limits.

Notes

Storebrand Bank Group

Note 1 - Company information and accounting policies

1. Company information

Storebrand Bank ASA is a Norwegian public limited company with bonds listed on the Oslo Stock Exchange. The consolidated financial statements for Storebrand Bank ASA for 2024 were approved by the Board of Directors on 11 February 2025.

Storebrand Bank ASA is an online bank that offers traditional bank products to the Norwegian retail market. These services include home loans, consumer loans, instant access accounts and cards, a variety of savings accounts, as well as mobile and internet banking. Storebrand Bank ASA is headquartered at Professor Kohts vei 9, Lysaker.

2. Essential accounting policies

2.1 Basis for preparation of the accounts

The accounting policies applied in the consolidated financial statements are described below. The policies are applied consistently to similar transactions and to other events involving similar circumstances.

Storebrand Bank ASA's consolidated financial statements are presented using IFRS® Accounting Standards as adopted by the EU and related interpretations, as well as other Norwegian disclosure requirements laid down in legislation and regulations.

Use of estimates in preparing the annual financial statements

The preparation of the annual financial statements in accordance with IFRS requires the management to make judgements, estimates and assumptions that affect assets, liabilities, revenue, expenses, the notes to the financial statements and information on potential liabilities. Actual amounts may differ from these estimates. See Note 2 for further information.

2.2 Changes in accounting policies

In 2024, no new accounting standards have been implemented that have had a significant effect on Storebrand Bank Group's financial statements.

2.3. New accounting standards that have not entered into force

New IFRSs that are not in force.

IFRS 18

IFRS 18 replaces IAS 1 Presentation of Financial Statements. IFRS 18 introduces new categories in the income statement, new requirements for reporting Management Performance Measures. The purpose is to provide increased transparency and comparability between companies' presentations. The standard will be implemented from 01.01.2027 and requires reworking comparative figures for 2026.

Storebrand has reviewed the new standard and assessed the effect these may have on the consolidated financial statements. Based on a preliminary assessment, it is not expected that the implementation of the standard will have a material effect on the Group's accounting policies, financial position or profit. Storebrand will continue to monitor any further updates or clarifications that may affect the ratings.

There are no other new or amended accounting standards that have not entered into force that are expected to have a material effect on Storebrand Bank Group's financial statements.

2.4. Consolidation

The consolidated financial statements include Storebrand Bank ASA and companies where Storebrand ASA has a controlling interest. A controlling influence is normally achieved when the Group owns, either directly or indirectly, more than 50 per cent of the shares in the company and the Group is in a position to exercise actual control over the company. Minority interests are included in the Group's equity.

Storebrand Boligkreditt AS is a directly owned subsidiary of Storebrand Bank ASA and the company is consolidated into the group.

2.5. Business combinations

When taking over a business, the takeover method is used. The consideration is measured at fair value. Direct takeover expenses are expensed when they arise, with the exception of expenses related to raising debt and equity (share issue). In the case of investments in subsidiaries, it is assessed whether the acquisition includes the acquisition of a business in accordance with IFRS 3. When such acquisitions do not include acquisitions of a business, the takeover method as set out in IFRS 3 is not applied. This means that, among other things, no provision is made for deferred tax as in an enterprise integration.

2.6. Goodwill and intangible assets

Surplus value on the acquisition of a business that cannot be allocated to assets or liabilities on the date of the acquisition is classified as goodwill in the balance sheet. Goodwill is measured at acquisition cost at the time of acquisition and is classified as an intangible asset.

Goodwill is not depreciated, but is tested for impairment annually when assessing recoverable amounts, or if there are indicators that indicate that a decline in value has occurred.

Intangible assets with a limited useful life are measured at cost less accumulated amortisation and any impairment. The depreciation period and method are assessed annually.

2.7. Income recognition

2.7.1. Net interest income

Income recognition of interest according to the effective interest method is used for interest-bearing balance sheet items that are valued at amortised cost and balance sheet items that are valued at fair value through other income and costs. The effective interest rate is the interest rate that causes the present value of future cash flows within the loan's expected term to be equal to the book value of the loan on initial recognition. Cash flows include start-up fees, as well as any residual value at the end of the expected term. Interest income on commitments that are credit impaired is calculated using the effective interest rate on impaired value. Interest income on commitments that have not been impaired by credit is calculated using the effective interest rate on gross amortised cost (amortised cost before provision for expected losses).

For interest-bearing balance sheet items that are valued at fair value through profit or loss, interest income is recognised based on nominal interest.

2.7.2. Other income

Fees are recognised when the income can be reliably measured and has been earned, fixed fees are recognised as income as the service is provided.

2.8. Financial assets and liabilities

2.8.1. Recognition

Ordinary purchases and sales of financial assets are booked on the transaction date and financial liabilities are booked on the settlement date.

2.8.2. Fair value

Fair value is the amount for which an asset could be exchanged between well-informed, willing parties in an arm's length transaction. The fair value of financial assets listed on a stock exchange or on another regulated market in which regular trading takes place is determined as the bid price on the last trading day up to and including the reporting date.

If a market for a financial instrument is not active, fair value is determined by using recognised valuation techniques. Such valuation techniques make use of recent arm's length market transactions between knowledgeable and independent parties, where available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis, and options pricing models. If a valuation technique is in common use by participants in the market for pricing the instrument and this method has proved to provide reliable estimates of prices actually achieved in market transactions, this method is used.

When calculating the fair value of loans, the current market rate on similar loans is used. Changes in credit risk are taken into account.

2.8.3. Classification and measurement of financial assets and financial liabilities

Financial assets are classified and measured into one of the following categories:

- Financial assets measured at amortised cost
- Financial assets measured at fair value with change in value through other income and costs with a reclassification of accumulated gains and losses for the profit or loss.
- Financial assets measured at fair value through profit or loss

Financial assets classified and measured at amortised cost

A financial asset is classified and measured at amortised cost if it is:

- primarily procured or established to hold the asset in order to collect contractual cash flows, which are only payment of principal and interest on given dates.

Financial assets measured at amortised cost are recognised at amortised cost using the effective interest method.

Storebrand Bank Group uses this category for claims on the central bank, lending to credit institutions, credit cards, credit accounts and consumer loans to customers, interest-bearing securities in a long-term investment portfolio and all items included in Other Assets.

Financial assets classified and measured at fair value through other comprehensive income, with a reclassification of accumulated gains and losses for the profit or loss

A significant share of the Storebrand Bank Group's financial instruments is classified under the category of fair value through other comprehensive income. A financial asset is classified and measured at fair value through other comprehensive income if the following condition is met:

- primarily procured or established to hold the asset in order to collect contractual cash flows, which are only payment of principal and interest on given dates and for sale.

Financial assets in this category are recognised at fair value with change in value through other comprehensive income. Associated interest income, foreign currency translation differences and any impairments are recognised in the ordinary profit or loss.

The Storebrand Bank Group uses this category for all mortgages to customers with variable interest rates.

Financial assets classified and measured at fair value through profit or loss

The Storebrand Bank Group has financial instruments that are classified under the category of fair value through profit or loss for the following reasons:

- the financial assets are included in a portfolio that is continuously measured and reported at fair value,
- the financial assets have cash flows generated not only by interest and instalments on the principal, or that
- such classification reduces the mismatch in the measurement or recognition that would otherwise arise as a result of the different rules for measuring assets and liabilities.

Interest income is recognised as income based on nominal interest, while other changes in value are presented as "Net change in value and gains/losses on currency and financial instruments".

The Storebrand Bank Group uses this category for all mortgages to customers with fixed interest rates, derivatives, shares and interest-bearing securities that are part of a short-term liquidity portfolio.

Financial liabilities

After initial recognition, all financial liabilities at amortised cost are measured by an effective interest rate method.

See also classification of financial instruments in note 18 (and note 18 for Storebrand Bank ASA).

2.8.4. Impairment

Pursuant to IFRS 9, loss provisions are recognised based on expected credit loss (ECL).

To estimate expected credit loss, models have been developed to calculate three indicators: probability of default (PD), loss given default (LGD) and exposure at default (EAD). These models have been derived from similar models used for internal assessments of capital needs. The models used for IFRS 9 purposes are based on the current macroeconomic situation and forecasts, and the models for PD, LGD and EAD are thus point in time (PIT) models, as opposed to through the cycle (TTC) models, which are used for capital needs purposes. The risk parameters in IFRS 9 have also been calibrated to be more forward-looking. Since the future is always uncertain, different future scenarios are used to compute PD, LGD and EAD for the bank's financial instruments. The various future scenarios have different weights determined by their position in the economic cycle and the forecasts of future events and economic conditions. The final expected credit loss per financial instrument will be a weighted average of the expected credit losses in the various scenarios. Total expected credit loss for the portfolio is the sum of the weighted credit losses per financial instrument.

In the PD model, financial circumstances are a significant predictor, combined with behavioural data on the individual customer. The model is a statistical model based on logistic regression. Loan-to-value ratio is a significant factor in the LGD model. For EAD, the most significant factors are loan size for downpayment loans and credit limit for lines of credit. The models are validated annually.

Forecasts affect the PD and LGD estimates in particular.

The Storebrand Bank Group uses future scenarios to calculate expected credit losses. The Storebrand Bank Group bases its future scenarios on the future scenarios presented by Norges Bank in its Financial Stability Report and assessments by Statistics Norway. The scenarios build on the current macroeconomic situation, economic forecasts, and the impact the macroeconomic situation is expected to have on the credit risk of the bank's financial instruments. These expectations affect the probability of default, exposure at default, and loss given default.

Among other things, PD is affected by unemployment, wage growth and interest rates. Higher unemployment and interest rates result in weaker capacity to service debt in the portfolio, and lower wage growth also entails weaker capacity to service debt and thus increased probability of default. Macrovariables will have different effects on the risk parameters, and the impact will vary significantly for the individual customers in the portfolio. Average PD will increase during periods of economic downturn.

Periods of economic downturn will, in isolation, result in weaker growth in house prices, which will in turn impact the loan-to-value ratio and thus also LGD. For many financial instruments, the losses will be very small, given the existing market prices. The increase in loss given default as a result of falling house prices is greater than the reduction in loss given default when house prices are rising. Nonlinearities in expected credit loss are taken into account by estimating expected credit loss in a variety of scenarios.

Stress tests and sensitivity tests are used in the assessment of expected credit loss. Sensitivity assessments of stage migration are carried out by assessing the change in expected credit losses if certain commitments migrate from stage 1 to stage 2. Sensitivity analyses are carried out in ICAAP on a regular basis.

The portfolio's ECL is considered to be sensitive to changes in observed default, loss and expected maturity of the financial assets. There is also model uncertainty associated with the individual estimates. Among other things, the uncertainty relates to estimates of size and development of different macrovariables in the future in each macro-scenario, as well as the impact the different outlooks have on individual parameters.

Definition of default

The Storebrand Bank Group has determined the definition of default in line with the recommendation given in the European Banking Authority's (EBA's) guide to implementing the default definition in accordance with Article 178 (EU Regulation 575/2013).

The definition of default is applied at debtor level with absolute and relative thresholds for arrears/overdrafts. Arrears/overdrafts for each individual commitment are measured in relation to the total debtor exposure. The absolute threshold is set at NOK 1,000 (per commitment), and the relative threshold is 1% of total debtor exposure. Joint commitments (commitments with multiple debtors) are defined as a separate risk point and are not included in the overall exposure for the respective individual customers.

Default occurs after 90 days with arrears/overdrafts above both absolute and relative thresholds. All debtor commitments are considered defaulted if default has occurred for at least one of these. In line with the guidance provided by the European Banking Authority (EBA), a probation period of 3 months is used. The probation period starts when default criteria are no longer in place. For the probation period to end, the arrears/overdrafts must be below the threshold values for the entire probation period.

A customer is deemed to be in default if one of the following criteria is met (unlikeliness to pay (UTP) criteria):

- the customer is in personal bankruptcy,
- the customer is in or has been placed in debt settlement proceedings,
- the bank has conducted an enforced sale of the customer's security,
- the customer no longer has an income that will adequately service the loan.

Definition of credit loss

Credit loss is a loss that arises from a credit risk where the loss is the difference between the value of the contractual cash flow and the expected cash flow discounted by the original effective interest rate.

The expected credit loss is the difference between the present value of the contractual cash flow and the expected probability-weighted cash flow.

An expected credit loss is estimated either by means of an individual assessment (individual impairment) or by using statistical models (model-based impairment) to calculate the expected probability-weighted cash flow.

An individual assessment with subsequent booking of individual impairments is carried out for commitments with objective evidence of loss and that the loss reduces the future cash flows of the commitment. Individually assessed commitments are moved to stage 3 (see a more detailed description of stage 3 below). Objective loss incidents can be significant financial problems involving a debtor, defaults, debt and/or bankruptcy proceedings for the debtor, or that this is likely, or forbearance caused by financial problems. The calculation of cash flow and the impairments are assessed based on the expected values.

For other commitments, expected credit loss is estimated using model-based impairment. The commitments are divided into different stages (see the section below on calculating expected credit loss). Model-based impairment depends on the stage to which the commitment belongs, parameter estimates for PD, EAD, LGD and expected maturity.

Calculating expected credit losses

The classification and changing of stages are described below.

Stage 1

The starting point for all financial assets is stage 1. Stage 1 encompasses all financial assets that do not have substantially higher credit risk than at initial recognition. Financial assets with low credit risk can be exempted and will still always be in Stage 1 even if the credit risk is significantly higher. Storebrand Bank does not currently apply this exemption rule. In stage 1, expected credit loss is calculated over 12 months.

Stage 2

Stage 2 consists of financial assets where there has been a significant increase in credit risk since initial recognition, but that are not in default or where there is objective evidence of loss. For financial assets in stage 2, expected credit loss is calculated over the expected term of the loan. The expected term deviates from the contractual term and is estimated on the basis of historically observed performance.

Stage 3

Stage 3 includes financial assets that are in default and/or which have objective evidence of loss. For commitments that have objective evidence of loss, an assessment of whether there must be individual impairment is carried out. For other commitments without individual impairment, the expected credit loss is calculated over the expected maturity of the asset.

Migrating to a lower stage

A commitment that no longer meets the criterion for stage 2 is moved to stage 1. The risk models ensure that there has been a sufficiently long period of payment before reducing and returning the risk to stage 1. A commitment in stage 3 can be moved both to stage 2, if stage-2 criteria are met, or directly to stage 1 once the criteria for stage 3 are no longer met.

Substantial increase in credit risk

Substantial increase in credit risk is assessed on the basis of the financial instrument's probability of default (PD) at the time of measurement compared with at initial recognition. The assessment is based on both changes in probability of default during the expected lifetime (lifetime PD) and changes in probability of default in the next 12 months (12 months PD). The assessments are based on absolute changes and relative changes.

For commitments where the 12-month probability of default (PD) upon initial recognition is less than 0.5 per cent, both a relative and an absolute criterion must be satisfied for the commitment to be considered to have a significant increase in credit risk. The relative criterion is a relative increase in lifetime PD of 150 per cent or more from initial recognition until the measurement date. The criterion is equivalent to the lifetime PD at the measurement date being greater than 2.5 multiplied by the lifetime PD at the recognition date. The absolute criterion is that the 12-month PD at the measurement date is 0.6 percentage points higher than the 12-month PD upon initial recognition.

For commitments where the 12-month probability of default (PD) upon initial recognition is more than or equal to 0.5 per cent, either a relative or an absolute criterion must be satisfied for the commitment to be considered to have a significant increase in credit risk. The relative criterion is identical to that stated above, i.e. an increase in lifetime PD of 150 per cent or more from initial recognition until the measurement date. The absolute criterion is that 12-month PD at the measurement date is 1.5 percentage points higher than 12-month PD upon initial recognition.

Commitments for which scheduled payment is overdue by 30 days or more are assessed, irrespective of whether this has caused a significant increase in the credit risk. The same applies to commitments for which forbearance has been granted on the basis of the customers' deteriorating financial situation, however is not serious enough to classify commitments as credit impaired.

Expected maturity

Expected maturity is estimated for various financial instruments. Expected maturity is significant because for commitments with a substantial increase in credit risk, i.e. commitments in stage, expected credit loss shall be calculated over the expected maturity of the commitments. The overall probability of default increases over the time horizon being measured, and the expected credit loss over the expected maturity of the commitment is therefore higher than the expected credit loss over one year, provided that the loan's remaining expected maturity is more than 12 months.

For stage 3 commitments, the agreed (contractual) maturity is used to measure expected losses.

Expected maturity is calculated for different products. Expected maturity is estimated at around five years for downpayment loans and six years for lines of credit. The expected maturity at the time of loan approval is estimated at 9 years for credit cards and 9 years for credit accounts. Expected maturity is also contractual maturity for top-up loans (loan share greater than LTV of 70%), building credit and bridging loans. Expected maturity is reassessed and validated regularly.

For ongoing commitments, expected maturity is adjusted by a maturity coefficient: The maturity coefficient is the ratio of expected maturity to contractual maturity. The remaining expected maturity is the expected maturity of the product multiplied by the maturity coefficient.

Categorisation into portfolios

The Storebrand Bank Group only has a retail portfolio, which is divided into:

- i) Housing loans and housing credit
- ii) Credit cards
- iii) Other credits

2.8.5. Derivatives

Derivatives that do not meet the criteria for hedging are classified and measured at fair value through profit or loss. The fair value of such derivatives is classified as either an asset or a liability with changes in fair value through profit or loss.

The majority of the derivatives used routinely for asset management fall into this category.

2.8.6. Hedge accounting

Fair value hedging

The Storebrand Bank Group uses fair value hedging. The items hedged are financial assets and financial liabilities measured at amortised cost. Derivatives are recognised at fair value through profit or loss. Changes in the value of the hedged item that are attributable to the hedged risk adjust the carrying amount of the hedged item and are recognised through profit or loss.

2.9. Tax

The Storebrand Bank Group includes companies that are both subject to and not subject to the financial tax. When capitalizing deferred tax/deferred tax assets in the consolidated financial statements, the company tax rate is used that is applicable for the individual companies (22 or 25 per cent).

Pillar two – minimum taxation

During January 2024, the Norwegian authorities decided to introduce changes to the tax legislation with effect from the 2024 income year. The new legislation introduces a supplementary tax, a global minimum taxation that will prevent profit shifting between countries, and ensure an effective tax rate of at least 15 percent.

Storebrand is covered by the new regulations, but it appears that Norwegian companies can make use of the exemption rules in Safe Harbour. Deferred tax related to the new regulations has therefore not been recognised in the Bank's accounts for 2024.

3. Statement of cash flows

The statement of cash flows is prepared using the direct method and shows cash flows grouped according to sources and uses. Cash is defined as cash, receivables from central banks and receivables from credit institutions with no agreed period of notice. The statement of cash flows is classified according to operating, investing and financing activities.

Note 2 - Key accounting estimates and judgements

In preparing the Group's financial statements the management are required to make judgements, estimates and assumptions of uncertain amounts. The estimates and underlying assumptions are reviewed on an ongoing basis, and they are based on historical experience and expectations of future events and represent the management's best judgement at the time the financial statements were prepared. Actual results may differ from these estimates.

The Bank Group's critical estimates and judgments that could result in material adjustment of recognised amounts are discussed below:

Continued high inflation, a weak Norwegian krone and a generally good Norwegian economy have meant that Norges Bank has kept the key policy rate unchanged throughout 2024. However, inflation has fallen throughout the year and central banks in the US, Europe and Sweden are well on their way to cutting interest rates. The first policy rate cuts are now expected in 2025. Many Norwegians, including our customers, have for several years had greater challenges dealing with higher prices and higher loan rates, but a good labour market and low unemployment have contributed to the fact that the personal financial situation has nevertheless been manageable for the vast majority. The housing market in 2024 has been surprisingly good, with price growth and high turnover in the second-hand housing market. At the same time, there has been little supply of new homes. Into 2025, the housing market is expected to remain strong, driven by announced interest rate cuts, few new homes on the market, good wage settlements and low unemployment.

When assessing impairment, overall evaluations have been made of future prospects, which have considered factors such as interest rates, inflation and high energy prices. Prospects of tighter liquidity among our customers due to higher costs of living and interest rate burden, have been taken into account in the macro adjustment of the probability of default. Developments in non-performing loans, loans in arrears and loans with grace periods are being closely monitored.

Loan loss provisions

For loans valued at amortised cost or at fair value through other comprehensive income, loss provisions are recognised based on the Expected Credit Loss (ECL) in accordance with the general method. The models in IFRS9 are based on present values ("Point In Time") of PD and LGD, which are estimated based on default and loss history. In the projections, PD and LGD are adjusted according to three scenarios. The three scenarios are weighted by a specified percentage:

- "base case" scenario that is expected development, 60 percent probability,
- "worst-case" scenario which is economic downturn, 20 percent probability,
- "best case" that is better than expected developments, 20 percent probability.

The models used for IFRS 9 are based on the current macroeconomic situation and forecasts, and the models for probability of default (PD), loss given default (LGD) and exposure at default (EAD) are thus point in time (PIT) models. Future scenarios are used to calculate PD, LGD and EAD for the commitments.

Forecasts affect the PD and LGD estimates in particular.

Among other things, PD is affected by unemployment, wage growth and interest rates. Periods of economic downturn will, in isolation, result in weaker growth in house prices, which will in turn impact the loan-to-value ratio and thus also LGD.

Scenario-adjusted PD and LGD are included in the expected loss (ECL) calculation.

The portfolio's ECL is considered to be sensitive to changes in observed default, loss and expected maturity of the financial assets. There is also model uncertainty associated with the individual estimates. Among other things, the uncertainty relates to estimates of size and development of different macro variables in the future in each macro-scenario, as well as the impact the different outlooks have on individual parameters.

A sensitivity analysis has been carried out of the expected loss for commitments in stages 1 and 2 in the event of a change in all 12-month PD estimates. If all 12-month PD estimates had increased by 10 per cent, expected losses would have increased by approximately 8 per cent. Similarly, with a 10 per cent reduction of all 12-month PD estimates, expected losses would have been reduced by about 9 per cent.

See also section 2.8.4. of Note 1 - Company information and accounting policies, for more information regarding impairment.

Financial instruments at fair value

There will be some uncertainty associated with the pricing of financial instruments not priced in an active market. This is particularly true of the types of securities priced on the basis of non-observable assumptions. Various valuation techniques are applied to these investments to determine the fair value. They include fixed-rate loans and other financial instruments where theoretical models are used for pricing. Any changes to the assumptions could affect recognised amounts.

Reference is also made to Note 10 in which the valuation of financial instruments at fair value is described in more detail (and Note 10 for Storebrand Bank ASA).

Contingent liabilities

The Storebrand Bank Group can be a party in legal disputes. Contingent liabilities are assessed in each case and will be based on legal considerations.

Note 3 - Transfer of shares in Kron AS

On 1 October 2024, Storebrand Bank ASA entered into an agreement with Storebrand ASA to transfer 100% of the shares in the sister company Kron AS. A capital increase of NOK 422 million has been made as capital contribution. The capital contribution has been made cf. the Norwegian Public Limited Liability Companies Act and the Financial Institutions Act. The transaction was completed in October 2024.

The transfer has been accounted for using the acquisition method. In the case of a transfer of a subsidiary with a capital contribution, a fair value analysis is carried out, assets and liabilities are assessed at fair value at the time of the transfer. A residual value in the transfer constitutes goodwill.

Following the transfer of Kron, a mother-daughter merger has been carried out. The merger has been carried out in accordance with the Norwegian Public Limited Liability Companies Act with accounting effect from 1 January 2024.

Note 4 - Risk management

Continuous monitoring and active risk management are core areas of the bank's activities and organisation. The strategy and planning process provides guidance for the business for the next few years. Strategy and plans are determined by the Board. The board determines the risk appetite and risk limits for the different forms of risk on an annual basis.

Organisation of Risk Management

The board of Storebrand Bank ASA has ultimate responsibility for monitoring and managing the organisation's risks. The board determines the annual risk appetite and risk strategy as well as ceilings and guidelines for the risks taken by the business, receives reports of actual risk levels and provides a forward assessment of risks.

The CEO is responsible for the bank group operating within the risk limits stipulated by the board. The CEO is responsible for operating the risk management and internal control system, including ensuring that the banking group is within the risk limits set by the Board. The CEO has overall responsibility for implementing risk management routines. The CEO has an advisory management group and the individual units are responsible for risk management in their respective areas.

The bank has a balance sheet management committee (BSK). BSK discusses and assesses financing, liquidity and market situation, including forecasts, and developments in balance sheet items that entail changes in the liquidity and funding situation. BSK meets regularly.

The Storebrand Group's organisation of risk management responsibility follows a model based on three lines of defence. The objective of the model is to safeguard the responsibility for risk management at both company and group level.

First line of defence

At the Storebrand Group, responsibility for risk management and internal control is an integral part of management responsibility. Managers at all levels of the company are responsible for risk management within their own area of responsibility. Good risk management requires clear mandate and division of responsibilities, targeted work on objectives, strategies and action plans, identification and assessment of risks and events, documentation of processes and routines, prioritisation and implementation of improvement measures, and good communication, information and reporting.

A high level of awareness of risks and risk management are vital elements of the group's culture.

The CEO and the management group at the bank, the CEO of Storebrand Boligkreditt AS and managers in the Storebrand group's areas that provide services for the bank, submit annual confirmation documenting the unit's risk management activities and internal control.

Second line of defence

Storebrand Bank ASA has independent control functions for the company's risk management (Chief Risk Officer, CRO) and for compliance (Chief Compliance Officer, CCO). The CRO and CCO are directly subordinate to the CEO and both report directly to the bank's board. CCO also holds the role of compliance officer according to money laundering regulations (AML). The CRO and CCO prepare regular reports to the Board. In terms of function the independent control functions are affiliated with the Governance Risk & Compliance (GRC) in the Storebrand Group, where CRO in Storebrand ASA is responsible to the Group CEO and reports to the board of Storebrand ASA.

Third line of defence

Internal auditing is under the direct authority of the board and is intended to give the board confirmation of the appropriateness and effectiveness of the organisation's risk management, including how the lines of defence are functioning.

Note 5 - Credit risk

Credit risk is the risk of loss associated with customers or counterparties not fulfilling their debt obligations. The risk includes risk associated with lending to customers and counterparty risk on loans to credit institutions and the central bank, securities and financial derivatives. Credit risk includes potential concentration risk in the loan portfolio. Credit risk is the most significant risk in the bank group. Credit risk for loans, guarantees and unused credits is most important both in terms of volume and risk level in general. This risk is discussed in the tables below. There is limited credit risk in connection with other exposure. See notes 19 and 20 for more information on the composition of the liquidity portfolio and note 22 for information on derivatives.

Risk Management

The risk strategy reflects how much credit risk the bank group is willing to accept. The willingness to accept risk is adjusted to the bank's risk appetite and goals regarding risk profile, capital adequacy and growth. Credit policies establish general principles for granting credit. The bank group's routines for credit management are set forth in the credit manual. The credit manual are primarily designed for account managers and others who are involved in case management processes. The credit manual contain common guidelines for the bank group's credit activities, and are intended to ensure uniform and consistent credit management practices.

Credit risk is assessed in relation to the capacity and willingness of customers, including any co-participants, to service debt and potential security. The bank uses credit risk models to conduct risk classifications of customers with regard to probability of default (PD) and loss given default (LGD) and expected exposure resulted in default (EAD). The credit assessments are mainly assessed in automated and semi-automated processes with automatic calculations

The credit manuals and adopted routines provide specific criteria for monitoring non-performance, loan covenants, loss assessments and the annual loan review. Furthermore, the models ensure uniform portfolio risk assessment classifications and reporting on risk development. The models are also used in assessing expected credit losses (ECL) in IFRS 9. There are functions for depot unit, loan establishment and administration of the customer portfolio. Credit is granted in accordance with an authorisation structure determined by the Board.

The loan portfolio is assessed in terms of sustainability risk on the basis of double materiality, i.e. where risk is assessed both for the bank and for the rest of the world. Environmental risk is considered to be the Bank's greatest sustainability risk, and it is climate risk that is assessed highest in the environmental risk. Climate risk is divided into physical risk and transition risk. For physical risk, the safety objects are assessed in relation to physical climate risk. For transition risk, energy classification is assessed, as well as estimated energy consumption and CO2 consumption.

Treasury has the credit risk for its exposures in the liquidity portfolio. Permitted exposures and the composition of the portfolio are set out in the bank group's counterparty risk policy.

Exposures with loans to credit institutions and the central bank, securities and financial derivatives with counterparties is included under credit risk and is managed according to a specific policy on the basis of an assessment of the counterparty's repayment capacity, rating and amount under management. Financial derivatives permitted by the bank are outlined in policy documents.

Risk control

Credit risk control is carried out directly in models and processes in various units in the first line, as well as with controls from the second line to ensure compliance with internal and external regulations. Exposure relating to trade in financial derivatives for customers is monitored by Back Office. Price development is monitored in respect of the customer's situation, cleared lines and breach clauses. The Middle Office conducts running spot checks with regard to this.

Trades made by Treasury are checked by the Middle Office in accordance with dedicated procedures and work descriptions.

The Chief Risk Officer (CRO) reports to the board on credit risk trends on an ongoing basis.

Maximum credit exposure

NOK million	Book value	Guarantees, unused credits and loan commitments	2024 Maximum credit exposure	2023 Maximum credit exposure

Storebrand Bank Group has no financial assets that are purchased or originated credit-impaired financial assets.

Credit exposure for lending activities

Retail market

Retail customers are evaluated according to their capacity and intent to repay the loan. In addition to their capacity to service debt, the customers are checked regarding policy regulations and the customers are scored using a scoring model. For other retail market customers, the overall loan to value ratio and debt servicing capability (as determined by the bank's credit policy for the segment) that apply to the portfolio are used as a basis. The securities for the portfolio are principally in properties for the retail market portfolio.

Storebrand Bank ASA has developed internal models for classifying home loans. The models estimate a loan's Probability of Default (PD), Loss Given Default (LGD), and Exposure at Default (EAD). PD estimates are based on a logistical regression model where late payment notices, reminders, overdrafts and information about assets are key

explanatory variables when predicting defaults. When estimating the LGD, the loan-to-value ratio is the most important explanatory variable. Home loans are classified according to the bank's master scale, consisting of 11 risk classes from A to K, with A indicating the lowest default probability and K containing non-performing loans. The classification of home loans is automatically updated on a monthly basis. As at the end of 2024, 46.8% of the EAD was linked to home loans in risk class A, while 4.7% of the EAD was in risk classes G to J. The models are validated on an annual basis, with the accuracy of the models compared to actual outcomes.

When entering into loan commitments, the Storebrand Bank ASA collects information of significance to the value of the residential property. Each quarter, the bank obtains an updated, independent valuation of residential properties from Eiendomsverdi AS. For homes where Eiendomsverdi AS does not have an up-to-date valuation (such as housing cooperative apartments, owner-tenant apartments and some leisure properties) the most recent updated market value is used until further notice. Where Eiendomsverdi AS cannot determine the market value of a property with a high degree of certainty, a "haircut" is used so as to reduce the risk of giving an inflated estimate of market value. If Eiendomsverdi AS has never received information regarding the property's market value, the value recorded at the time of entering into the contract (the deposit value) will be used. Loans such as those mentioned here constitute just under 1% of the total portfolio exposure.

In the retail market, most of the loans are secured by way of home mortgages. NOK 68.6 billion has been lent in home loans, with a further NOK 5.5 billion in undrawn credit facilities. Total commitments in residential property are therefore approximately NOK 74.0 billion. The weighted average loan-to-value ratio is just under 62% for home loans. Approximately 79% of loans have a loan-to-value ratio within 80% and 99.7% have a loan-to-value ratio within 100%. Approximately 44% of the home loans have a loan-to-value ratio within 60%. The portfolio is regarded as having a low to moderate credit risk in accordance with the bank's risk appetite.

The security for non-performing loans without impairment among retail customers is essentially satisfactory. The average loan-to-value ratio for these loans is 75%. Home loans/residential mortgages that are part of the volume of non-performing loans without impairment are NOK 293 million. The security is also good on home loans/residential mortgages between 1 and 90 days past due. Assets pledged as collateral are sold in the retail market. They are not taken over by the bank.

In the credit card and account credit portfolio, approximately NOK 232 million has been drawn, and NOK 1.2 billion is available as unused credit facilities. The consumer loan portfolio is approximately NOK 178 million.

The Storebrand Bank Group had a volume of NOK 376 million of loans with forbearance at the end of 2024. In exceptional cases, the bank grants relief for commitments with mortgages in the form of a grace period for loans with a loan-to-value ratio above 60%. Short-term grace periods are also granted for consumer loans. At the end of 2024, there was approximately NOK 18 million in consumer loans registered with grace periods, and thus forbearance..

This year's change in value of related credit derivatives				
Accumulated change in value of related credit derivatives				

Lending to customers is measured at fair value based on valuation techniques. The valuation techniques use interest rate curves from Reuters and credit spreads for equivalent new loans as per the end of December.

Financial assets are designated at fair value through the profit and loss account (FVTPL) the first time they are recognised where another measurement would result in an inconsistency in the profit and loss account. Objective market prices are used for securities where these exist. Valuation techniques involving the use of interest rate curves from Reuters and credit spreads from external providers are used for the remaining securities.

Note 6 - Liquidity risk

Liquidity risk is the risk that the company will be unable to refinance its obligations (refinancing risk) or that the company will not be able to refinance its obligations without incurring substantial additional expenses (price risk).

Risk Management

The risk strategy establishes overall limits for how much liquidity risk the bank group is willing to accept given a goal of having the lowest possible financing costs (price). The policy for liquidity risk describes principles for liquidity- and financing management and specifies stress testing, minimum liquidity holdings and indicators for measuring liquidity and financing risk. In addition, the Treasury department draws up an annual funding strategy and funding plan that set out the overall limits for the bank group's funding activities.

Stress tests are used to illustrate the expected effects of various scenarios on the statement of financial position and cash flows. Results of the stress tests are applied when assessing the framework for liquidity risk. A contingency plan is drawn up annually to safeguard proper management of the liquidity situation during stressful periods.

The Treasury function is responsible for the bank's liquidity management, and the Middle Office monitors and reports on the utilisation of limits pursuant to the liquidity policy. Risk management prepares liquidity forecasts.

Risk Control

Risk control of liquidity and financing risk is carried out, among other things, through monthly liquidity forecasts, reporting of liquidity and financing indicators and maturity profile. Both are included in the CRO's ongoing reporting to the board. Indicators that are followed are described in the liquidity risk policy. The Middle Office performs checks on trades undertaken by Treasury to ensure conformance with the applicable policy rules.

Non-discounted cash flows - financial liabilities

The overview of non-discounted cash flows includes interest. Implicit forward interest rates based on the yield curve on 31 December 2024 are used to calculate interest costs for lending with FRN conditions. The call date is used as the maturity date on subordinated loans. The maturity overview does not take account of the fact that the issued bonds have extended maturity date, i.e. the original maturity date is used. Deposits from and liabilities to customers are on call deposits or deposits locked in for less than 6 months.

Note 7 - Market risk

Market risk is risk of a change in value due to financial market prices (such as interest rates, exchange rates, credit spreads) or volatility differing from what was expected.

Risk Management

The risk strategy sets general limits for market risk. Storebrand Bank Group's market risk mostly are related to spread risk in the liquidity portfolio and interest rate risk, both on equity and net interest income. The banking group is to a small extent exposed to market risk in equity instruments and currency. Storebrand Boligkreditt AS has issued a covered bond of EUR 50 million, see note 6, which is secured by a base swap.

Market risk policies specify limits for market risk that the bank group is willing to accept. The bank group's market risk is primarily managed and controlled through daily monitoring of risk exposure pursuant to the policy and continuous analyses of outstanding positions. Credit spread risk is regulated through ceilings on credit spread risk and indirectly through ceilings on investments.

The exposure limits are reviewed and renewed by the board at least once a year. The size of these limits is set on the basis of stress tests and analyses of market movements.

Risk Control

The Middle Office is responsible for the ongoing, independent monitoring of market risk. Risk control of market risk is carried out, among other things, through monthly reports of indicators for market risk. Market risk indicators that are followed are described in the interest rate risk policy, counterparty policy (incl. credit spread risk) and currency risk policy and are included in the CRO's ongoing reporting to the board.

For changes in market risk that occur during the first year, the effect on the result and equity will be as shown below based on the balance sheet as at 31 December 2024:

Effect on accounting income

NOK million	2024	2023
Interest rate -2,0%	-54.9	-18.5
Interest rate +2,0%	54.9	18.5

Effect on accounting result/equity ¹⁾

NOK million	2024	2023
Interest rate -2,0%	-54.9	-18.5
Interest rate +2,0%	54.9	18.5

1) Before taxes.

Financial interest rate risk

NOK million	2024	2023
Interest rate -2,0%	64.2	33.5
Interest rate +2,0%	-64.2	-33.5

The note presents the accounting effect over a 12 month period and the immediate financial effect of an immediate parallel change in interest rates of +2.0 percentage points and -2.0 percentage points respectively. When the accounting risk is calculated, account is taken of the non-recurring effect that such an immediate change in interest rates would have on the items recognised at fair value and the value of hedging, and the effect that the change in interest rates would have on the net profit for the remaining duration of the interest rate before the change in interest rates has an effect on income and expenses. Items that would be affected by the non-recurring effect and are recorded at fair value are the investment portfolio, fixed interest rate loans and derivatives. Items that would be affected by the one-time effects and which are recorded using hedging accounting are borrowings with fixed interest rate. The change in market value that such an immediate change in interest rates would have is looked at for all items on the statement of financial position when calculating the financial effect.

See also note 23 regarding foreign exchange risk.

Note 8 - Operational risk

Operational risk

The assessment of operational risks is linked to the ability to achieve targets and to implement plans. Operational risk is defined as the risk of financial loss or damaged reputation due to inadequate or failing internal processes, control routines, systems, human error, or external events.

Risk Management

Operational risk is being controlled and reduced through an effective system for internal control with (1) clear descriptions of responsibilities, (2) clear routines, and (3) documented powers of attorney/authority. Risks are followed-up through the management's risk review, with documentation of risks, measures and follow-up of incidents. The bank has prepared contingency plans which are updated regularly. In addition, internal audit carries out an independent control in accordance with audit projects adopted by the board.

Risiko Control

The CRO supports the risk review process and is responsible for compiling and reporting the area's risk scenario, following up on improvement measures and checking that risk registration is up to date in the central system. The results of the process are reported to the board.

In order to be able to identify problem areas internally, the bank group has implemented routines for ongoing reporting of events to the CRO, who is responsible for logging and follow-up of reported events. The CRO reviews significant events with the board.

In connection with monthly, quarterly and annual accounts, the bank's staff functions perform various checks and reconciliations so as to control and reduce operational risk. In addition to this, the compliance function and internal auditor carry out spot checks in a number of the most important work processes. The results are reported to the bank's management and the board.

Compliance risk

Compliance risk is the risk of the company incurring public sanctions, financial losses, claims for damages and/or loss of reputation as a result of non compliance with external or internal rules.

Risk Management

The compliance risk in Storebrand Bank Group is managed through instructions for the compliance function. The function's main responsibility is to support the company's board and management in their efforts to comply with relevant laws and regulations by independently identifying, evaluating, monitoring and reporting compliance risks. The function shall work preventively by advising and ensuring that effective processes have been established for information and the implementation of current and new regulations. The compliance function shall have a risk-based approach.

Risk Control

The compliance function performs control activities in order to ensure actual compliance with significant regulations.

Note 9 - Climate risk

Risk of increased loan losses as a result of climate change or the transition to low emissions

The macroeconomy in some areas/regions is weaker, particularly as a result of transition risks. The debtor risk increases as a result. The value of security objects develops relatively weaker than other objects as a result of physical risk (market values develop weaker in areas where, for example, there is a greater risk of flooding, landslides, precipitation than the market in general) and/or transition risk (market values fall more in areas with greater transition risk due to weaker economic development). The risk may materialise in higher loan losses. Developments in climate risk in the portfolio are monitored in order to be able to act in the event of undesirable changes. Climate risk has not affected the loss provisions in the accounts for 2024. Reference is made to a further description of climate risk in the annual report.

Note 10 - Valuation of financial instruments

The Storebrand Bank Group conducts a comprehensive process to ensure that financial instruments are valued as closely as possible to their market value. Publicly listed financial instruments are valued on the basis of the official closing price on stock exchanges, supplied by Reuters and Bloomberg. Bonds are generally valued based on prices collected from Reuters, Bloomberg and Nordic Bond Pricing. Bonds that are not regularly quoted will normally be valued using recognised theoretical models. The latter is particularly applicable to bonds denominated in Norwegian kroner. Discount rates composed of the swap rates plus a credit premium are used as a basis for these types of valuations. The credit premium will often be specific to the issuer, and will normally be based on a consensus of credit spreads quoted by a selected brokerage firm.

Unlisted derivatives, including primarily interest rate and foreign exchange instruments, are also valued theoretically. Money market rates, swap rates, exchange rates and volatilities that form the basis for valuations are supplied by Reuters, Bloomberg and Norges Bank.

The Storebrand Bank Group carries out continual checks to safeguard the quality of market data that has been collected from external sources. These types of checks will generally involve comparing multiple sources as well as controlling and assessing the likelihood of unusual changes.

The Storebrand Group categorises financial instruments valued at fair value into three different levels which are described in more detail below. The levels express the differing degrees of liquidity and different measurement methods used. The bank group has established valuation models to gather information from a wide range of well-informed sources with a view to minimising the uncertainty of valuations.

Level 1: Financial instruments valued on the basis of quoted prices in active markets for identical assets

Bonds, certificates or equivalent instruments issued by nation states are generally classified as level 1. When it comes to derivatives, standardised stock index futures and interest rate futures will also be included at this level.

Level 2: Financial instruments valued on the basis of observable market information not covered by level 1

This category encompasses financial instruments that are valued based on market information that can be directly observable or indirectly observable. Market information that is indirectly observable means that the prices can be derived from observable related markets. Level 2 includes shares or equivalent equity instruments for which market prices are available, but where the volume of transactions is too limited to fulfil the criteria in level 1. Shares in this level will

normally have been traded during the last month. Bonds and equivalent instruments are generally classified in this level. Moreover, interest rate and foreign exchange swaps, non-standardised interest rate and foreign exchange derivatives are classified in level 2.

Level 3: Financial instruments valued on the basis of information that is not observable according to the definition for level 2

Financial instruments classified as level 3 includes all loans to customers, loans to and deposits with credit institutions and the investment in VN Norge AS.

The value of fixed-rate loans is determined by discounting the agreed cash flows over the remaining maturity by the current discount rate adjusted for market spread. The discount rate that is used is based on a swap interest rate (mid swap) with a maturity that corresponds to the remaining lock-in period for the underlying loans. The market spread that is used on the date of the balance sheet is determined by assessing the market conditions, market price and the associated swap interest rate.

The value of home loans with a floating interest rate are valued at nominal value less expected credit loss. Loans without any substantially higher credit risk than at initial recognition are valued at nominal value. Loans where there has been a significant increase in credit risk since initial recognition or loans where there is objective evidence of loss, are valued at nominal value less expected credit loss over the lifetime of the loan.

Under equities, it is primarily the investment in VN Norge AS. The value of the shares is calculated on the basis of the price of the shares in VISA Inc. and the exchange rate USD / NOK. The value has also been adjusted for a liquidity and general uncertainty discount of 14%.

Subordinated loans		827.4		827.4	828.7	817.1	828.6
Total financial liabilities 31.12.2024		73,714.9		73,714.9	73,819.8		
Total financial liabilities 31.12.2023		65,212.5				65,212.5	65,214.0

The fair value of interest-bearing securities, debt securities issued and subordinated loans is based on normal valuation techniques. Cash flows are discounted over the remaining term with the current discount factor. The discount factor used is based on a swap rate (mid swap) with a maturity that corresponds to the maturity of the underlying financial instrument. For the items loans to and deposits with credit institutions and loans to customers fair value is amortised cost with deduction of expected credit loss. For the items loans to and deposits from credit institutions and deposits from and due to customers fair value is approximately equal to amortised cost.

Sensitivity analysis financial instruments at fair value

Loans to customers at fair value through other comprehensive income (OCI)

The value of home loans with a floating interest rate are valued at nominal value less expected credit loss. Loans without any substantially higher credit risk than at initial recognition are valued at nominal value. Loans where there has been a significant increase in credit risk since initial recognition or loans where there is objective evidence of loss, are valued at nominal value less expected credit loss over the lifetime of the loan.

Equities

This item consist of shares in VN Norge AS. At the end of the year, the value of the shares is calculated on the basis of the price of the shares in VISA Inc. and the exchange rate USD / NOK. The value has also been adjusted for a liquidity and general uncertainty discount of 14%.

1) Services purchased from the group contain expenses relating to bank production, IT services, joint administrative functions, financial and legal services, marketing activities, HR and skills development, purchasing, information services and savings advice.

Note 15 - Pensions

Storebrand is obliged to have an occupational pension scheme pursuant to the Mandatory Occupational Pension Act. The company's pension schemes meet the requirements of the law. Storebrand Group has country-specific pension schemes.

Storebrand's employees in Norway have a defined-contribution pension scheme. In a defined-contribution scheme, the company allocates an agreed contribution to a pension account. The future pension depends upon the amount of the contributions and the return on the pension account. When the contributions have been paid, the company has no further payment obligations relating to the defined-contribution pension and the payment to the pension account is charged as an expense on an ongoing basis. For regulatory reasons, there can be no savings in the defined-contribution pension for salaries that exceed 12G (G = National Insurance Scheme basic amount). Storebrand has pension savings in the savings product Extra Pension for employees with salaries exceeding 12G.

The premiums and content of the defined-contribution pension scheme are as follows:

- Saving starts from the first krone of salary
- Savings rate of 7 per cent of salary from 0 to 12 G (the National Insurance basic amount "G" was NOK 124,028 at 31 December 2024).
- In addition, 13 per cent of salary between 7.1 and 12 G is saved.
- Savings rate in Extra Pension for salary over 12 G is 20 per cent.

The Norwegian companies participate in the Joint Scheme for Collective Agreement Pensions (AFP). The private AFP scheme provides a lifelong supplement to an ordinary pension and is a multi-employer pension scheme, but there is no reliable information available for inclusion of this liability on the statement of financial position. The scheme is financed by means of an annual premium that is defined as a percentage of salaries from 1 G to 7.1 G, and the premium rate was 2.7 % in 2024 and is unchanged in 2025.

There are also pension liabilities for the defined-benefit scheme related to direct pensions for certain former employees and former board members.

Reconciliation of pension assets and liabilities in the statement of financial position

NOK million	2024	2023

Pillar two – minimum taxation

During January 2024, the Norwegian authorities decided to introduce changes to the tax legislation with effect from the 2024 income year. The new legislation introduces a supplementary tax, a global minimum taxation that will prevent profit shifting between countries, and ensure an effective tax rate of at least 15 percent.

Storebrand is covered by the new regulations, but it appears that Norwegian companies can make use of the exemption rules in Safe Harbour. Deferred tax related to the new regulations has therefore not been recognised in the Bank's accounts for 2024.

Note 18 - Classification of financial assets and liabilities

NOK million	Amortised cost	Fair value through profit and loss	Fair value through other comprehensive income (OCI)	Total book value 2024	Total book value 2023
Financial assets					
Cash and deposits with central banks	6.1			6.1	6.2
Loans to and deposits with credit institutions	2,781.5			2,781.5	1,137.9
Equity instruments		46.5		46.5	44.4
Interest-bearing securities	6,277.5	1,566.9		7,844.4	9,362.0
Derivatives		119.3		119.3	89.9
Lending to customers	355.0	776.5	67,721.3	68,852.8	59,609.1
Other current assets	69.4			69.4	50.0
Total financial assets 2024	9,489.5	2,509.3	67,721.3	79,720.0	
Total financial assets 2023	7,580.2	3,837.1	58,882.2		70,299.4
Financial liabilities					
Loans and deposits from credit institutions	3,414.8			3,414.8	283.2
Deposits from and due to customers	31,403.4			31,403.4	23,948.2
Debt securities issued	38,172.9			38,172.9	40,154.1
Derivatives		81.3		81.3	62.3
Other liabilities	191.8			191.8	187.3
Subordinated loans	828.7			828.7	828.6
Total financial liabilities 2024	74,011.6	81.3	0.0	74,092.9	
Total financial liabilities 2023	65,401.3	62.3			65,463.7

Note 19 - Interest-bearing securities at fair value through profit and loss account

NOK million	2024 Fair value	2023 Fair value
Sovereign and Government Guaranteed bonds	350.5	670.1
Mortgage and asset backed bonds	1,216.4	2,681.5
Total interest-bearing securities at fair value	1,566.9	3,351.6
Modified duration	0.77	0.17
Average effective yield per 31.12.	4.88 %	4.94 %

The portfolio is mainly denominated in NOK. Calculated effective yields are weighted to give an average effective yield on the basis of each asset's share of the total interest rate sensitivity.

Note 20 - Interest-bearing securities at amortised cost

NOK million	2024		2023	
	Book value	Fair value	Book value	Fair value
Public issuers and Government Guaranteed Bonds	3,520.0	3,518.8	3,540.7	3,530.9
Mortgage and asset backed bonds	2,757.5	2,764.8	2,469.6	2,471.4
Total interest-bearing securities at amortised cost	6,277.5	6,283.6	6,010.4	6,002.2
Modified duration		0.26		0.13
Average effective yield per 31.12.		4.88 %		4.97 %

The portfolio is mainly denominated in NOK. Calculated effective yields are weighted to give an average effective yield on the basis of each asset's share of the total interest rate sensitivity.

Note 21 - Buyback agreements (repo agreements)

NOK million	2024 Book value	2023 Book value
<i>Liabilities related to Repurchase agreements (Repo)</i>		
Bonds received as collateral	3,151.6	1,009.4
Posted as loans and deposits from credit institutions	3,103.7	1,009.4
<i>Assets linked to Repo debt (reverse Repo)</i>		
Received bonds not recognised in the balance sheet	2,743.0	
Posted as loans to and deposits with credit institutions	2,702.6	

Storebrand Bank ASA has entered into three repo agreements as of 31 December 2024.

Bonds received as collateral are not recognised as all risk and return on the securities are retained by the counterparty.

Note 22 - Financial derivatives

Financial derivatives are linked to underlying amounts which are not carried on the balance sheet. In order to quantify the volume of derivatives, reference is made to such underlying amounts as underlying principal, nominal volume, etc. Different calculation methods are applied to nominal volume for different types of financial derivatives, and this figure expresses the scope of risk and positions of financial derivatives.

Gross nominal volume primarily provides information on scope, while net nominal volume provides a certain expression of risk positions. However, the nominal volume for different instruments is not necessarily comparable, considering the risk exposure. As opposed to gross nominal volume, the calculation of net nominal volume also takes into account the sign for the instrument's market risk exposure, by differing between so-called asset positions and liability positions.

An asset position in a share derivative implies a positive change in value if share prices rise. For interest derivatives, an asset position implies a positive change in value if interest rates are reduced – as is the case with bonds. An asset position in a currency derivative generates a positive change in value if the exchange rate against the NOK sees an increase. The average gross nominal volume is based on daily calculations of gross nominal volume.

NOK million	Gross nom. volume ¹⁾	Gross recognised financial assets	Gross recognised debt	Net financial assets/debt in the balance sheet	Net amounts taken into account netting agreements		Net amount
					Fin. assets	Fin. debt	
Interest derivatives ²⁾	3,264.3	119.3	81.0				38.3
Currency derivatives	174.2		0.3				-0.3
Total derivatives 31.12.2024	3,438.4	119.3	81.3				38.1
Total derivatives 31.12.2023	2,092.7	89.9	62.3				27.5

1) Values as at 31.12.

2) Interest derivatives include accrued, not due, interest.

Investments subject to netting agreements /CSA

NOK million	Recognised assets	Recognised liabilities	Net assets	Collateral		Net exposure
				Cash (+/-)	Securities (+/-)	
Investments subject to netting agreements	109.9	79.4	30.5	77.7	-100.0	52.9
Investments not subject to netting agreements	9.4	1.9	7.5			
Total 2024	119.3	81.3	38.1			
Total 2023	89.8	62.3	27.5			

Note 23 - Foreign exchange risk

Financial assets and liabilities in foreign currency

NOK million	Balance sheet items excluding currency derivatives Net in the balance sheet	Currency forwards Net sales	Net position 2024 in currency	Net position 2024 i NOK	Net position 2023 in NOK
CHF			0.0		0.1
DKK	-0.4	0.4			
EUR	-0.3	0.4			0.1
GBP				0.1	-0.1
JPY	-11.2	12.0	0.8	0.1	
SEK	-1.2	1.2			
USD	-0.2	0.2			
Other			0.1		
Total net currency positions				0.3	0.2

The permitted limit for the bank's foreign exchange position is 0.30% of primary capital, which is approximately NOK 18 million at present.

Note 24 - Loans, guarantees and unused credits

NOK million	2024 Book value	2023 Book value
Loans to customers at amortised cost	420.0	422.9
Loans to customers at fair value through profit and loss (PL)	776.5	351.3
Loans to customers at fair value through other comprehensive income (OCI)	67,798.6	58,927.8

- other exposures including SME exposures	1.1	-0.9	0.2		
Total loss-exposed loans with evidence of impairment	240.7	-38.9	201.8		

The bank group has loans of NOK 130.3 million in stage 3 where no loan loss provisions have been made due to the value of collateral.

NOK million	2023				
	Gross amount	Loan loss provisions	Net value	Value of collateral	Type of collateral
Non-performing loans without evidence of impairment					
- retail exposures secured by mortgages on immovable property	213.0	-7.0	206.0	339.8	residential property
- unsecured retail exposures including credit cards exposures	54.2	-38.0	16.2		
Total non-performing loans without evidence of impairment	267.2	-45.0	222.2		
Loss-exposed loans with evidence of impairment					
- retail exposures secured by mortgages on immovable property	110.9	-20.3	90.6	137.0	residential property
- unsecured retail exposures including credit cards exposures					
- other exposures including SME exposures	1.1	-1.1			
Total loss-exposed loans with evidence of impairment	112.0	-21.4	90.6		

The bank group has loans of NOK 112.2 million in stage 3 where no loan loss provisions have been made due to the value of collateral.

Note 29 - Forbearance

Loans with payment forbearance are loans where relief has been granted as the customer has payment problems, and the bank would not have granted these terms in an ordinary loan issue.

NOK million	2024			2023		
	Stage 2	Stage 3	Total	Stage 2	Stage 3	Total
Loans to customers secured:						
Forbearance loans to customers, gross	341.9	15.4	357.3	351.0	2.5	353.5
Expected credit loss (ECL)	-0.7	-0.4	-1.1	-0.3		-0.4
Forbearance loans to customers (secured loans), net	341.2	15.1	356.2	350.7	2.5	353.2
Loans to customers unsecured:						
Forbearance loans to customers, gross	11.2	7.0	18.3	13.2	4.8	18.0
Expected credit loss (ECL)	-1.4	-4.9	-6.3	-0.8	-3.5	-4.3
Forbearance loans to customers (unsecured loans), net	9.8	2.1	11.9	12.4	1.3	13.7
Total loans to customers:						
Forbearance loans to customers, gross	353.1	22.5	375.6	364.2	7.3	371.5
Expected credit loss (ECL)	-2.1	-5.3	-7.4	-1.2	-3.5	-4.7
Forbearance loans to customers (secured and unsecured loans), net	351.0	17.2	368.2	363.0	3.8	366.8

In exceptional cases, the Bank grants relief for commitments with mortgages in the form of a grace period for loans with a loan-to-value ratio above 60%. Short-term grace periods are also granted for consumer loans.

Note 30 - Intangible assets

Kron AS				225.0		225.0	

Calculations related to the future will be uncertain. The value will be affected by various growth parameters, expected return and the required rate of return, etc. It is emphasised that the objective of the calculation is to obtain sufficient assurance that the value in use, cf. IAS 36, is not lower than the recognised value in the financial statements. Simulation with reasonable and also conservative assumptions indicates a value of the investment that justifies book value.

Calculation of recoverable amount for significant and non-significant intangible assets and goodwill

To determine whether goodwill and other intangible assets have been subject to impairment, recoverable amounts are estimated for the relevant cash-flow generating units. Recoverable amounts are determined by calculating the enterprise's use value.

To estimate value in use, management uses discounted future cash flows for a period of five years. The calculations are based on budgets processed by the board and forecasts for the coming three-year period (2025-2027). For the period 2028-2029, the administration has made assessments and determined an annual growth per item in the income statement.

The main assumptions used in the calculation of use value include:

Discount rate: The discount rate is determined using the CAPM model. For risk-free rates, ten-year government bonds are used for the jurisdiction to which the company belongs. Beta is determined by using Damodaran's European beta values for the relevant industry. The market risk premium has been set at 5 per cent for all units.

Terminal Value Growth Rate: The terminal value growth rate is set at 2 percent, which is in line with the expected long-term growth rate of the market.

Key assumptions: Board-approved budget and forecast assumptions are based on historical experience, market conditions and management's expectations for future developments.

Intangible assets related to Kron

In 2023, Storebrand ASA acquired Kron AS (Kron). In connection with the acquisition, added value related to customer relations, IT systems, brand and goodwill was identified. Storebrand ASA transferred the shares to Storebrand Bank ASA in October 2024 in the form of a non-cash contribution and the transaction was made with the group account. In calculating value in use, management has used budgets and forecasts processed by the board for the coming three-year period (2025-2027). For the period 2028-2029, the administration has made assessments and determined an annual growth per item in the income statement of 6 per cent. A growth rate of 2 per cent is used to calculate the terminal value. The main drivers of long-term profit growth will be influenced by assumptions about expected returns in the financial markets, management fees and underlying inflation. The value in use is calculated by using a required rate of return after tax of 8 per cent.

Note 31 - Deposits from and due to customers

NOK million	2024 Book value	2023 Book value
Deposits from customers without agreed maturity	28,497.4	17,624.8
Term loans and deposits from customers with agreed maturity	2,905.9	6,323.4
Total deposits from customers	31,403.4	23,948.2

Deposits without an agreed maturity have no binding period and the customer disposes of the deposits as they wish. Deposits with an agreed maturity are fixed-rate deposits, deposit accounts, BSUs, tax deduction accounts and accounts linked to pension agreements.

Deposits from customers per sector and industry classification and geographical distribution

Total	31,403.4	23,948.2

Note 32 - Hedge accounting

The Storebrand Bank Group complies with IFRS 9 for hedge accounting. The Storebrand Bank Group's interest rate risk strategy is defined in the interest rate risk policy, which sets frameworks for limiting the company's interest rate risk exposure. The group uses fair value hedging to reduce the interest rate risk on borrowings with fixed interest terms. The risk that is hedged in accordance with the interest rate risk policy is Nibor. This entails that separate credit risk is not hedged by keeping the credit spread constant as when established. Hedged risk accounts for approximately 90% of the total interest rate risk exposure in the loans. Fair value hedging of the hedged item is interest rate hedged by entering into an interest rate swap in which we swap from fixed to variable interest to reduce the risk associated with future changes in interest rates. The hedging satisfies the requirements for hedge accounting at individual transaction level by a hedging instrument being directly linked to a hedged item and the hedging relationship being adequately documented.

All hedging relationships are established with an identical fixed interest profile, i.e. fixed interest, principal, coupon dates and maturity, both in the object and the instrument. The instrument swaps from fixed interest to variable interest quoted on Nibor three months. The fixed leg is between 2% to 4.5%. The hedging relationship is expected to be highly effective in counteracting the effect of changes in fair value due to changes in interest rates. Net recognised changes in value of fair value hedges are due to changes in value resulting from changed market interest rates, i.e. hedged risk. This is entered in the accounts under "Net unrealised changes in value of financial instruments". The hedging efficiency is measured based on the basic "Dollar Offset" method with regard to prospective efficiency.

Storebrand Bank has identified the following sources of inefficiency:

- Change in value of the short leg (Nibor 3 months).
- Credit risk for counterparty.

It is not expected that these factors will create significant inefficiency. No other sources of inefficiency were identified during the financial year.

NOK million	2024				2023

Guarantees	0.3	0.3
Undrawn credit limits	6,627.1	4,883.3
Loan commitments retail market	2,711.5	2,607.0
Total contingent liabilities	9,338.8	7,490.6

Guarantees are mainly payment guarantees and contract guarantees. See also note 25. Undrawn credit limits relate to the unused portion of credit limits approved on overdraft accounts and credit cards, as well as the unused portion of lending limits on flexible mortgages.

Note 35 - Collateral

Received and issued collateral

NOK million	2024	2023
Received collateral in connection with trade of derivatives	81.0	55.3
Total	81.0	55.3

Collateral and security pledged

NOK million	2024	2023
Booked value of bonds pledged as collateral for the bank's lending from Norges Bank	4,437.6	1,428.6
Booked value of securities pledged as collateral in other financial institutions	101.1	152.3
Total	4,538.7	1,580.9

Securities pledged as collateral are linked to lending access in Norges Bank for which, pursuant to regulations, the loans must be fully guaranteed with collateral in interest-bearing securities and/or the bank's deposits in Norges bank. Storebrand Bank ASA has F-loans for a total of NOK 210 million from Norges Bank as of 31.12.2024.

Loan security at Storebrand Boligkreditt AS

Of the total volume of home mortgages of NOK 68.4 billion in the bank group, NOK 46.2 billion is loans in Storebrand Boligkreditt AS. The loans in Storebrand Boligkreditt AS have been mortgaged in connection with the issuing of covered bonds (covered bond rate) in Storebrand Boligkreditt AS. Storebrand Boligkreditt AS has over-collateralisation (OC) of 23.5 per cent. The company must maintain the applicable OC that the rating agency requires if the company wishes to retain the current AAA rating. At the end of 2024 the requirement was 6.1 per cent. The statutory OC is 5 per cent. Storebrand Boligkreditt AS has security that is NOK 2.0 billion more than what the present rating requires. Storebrand Bank ASA therefore considers the security to be adequate.

Note 36 - Capital adequacy

Capital adequacy calculations are subject to special consolidation rules in accordance with the regulation on consolidated application of the capital adequacy rules etc. (the "Consolidation Regulation"). The Storebrand Bank Group is defined pursuant to Section 5 of the Consolidation Regulation as a financial group comprising solely or mainly undertakings other than insurance companies. Profit for the year has been added to net primary capital.

Net primary capital

Services purchased	73.9	79.9
Due from	200.2	297.4
Liabilities to	174.5	399.0

1) Other group companies are companies in other sub-groups within the Storebrand Group.

Transactions with group companies are based on the principle of transactions at arm's length.

Loans sold to Storebrand Livsforsikring AS

Storebrand Bank ASA has sold mortgages to sister company Storebrand Livsforsikring AS. In 2024, there has been sold loans of total NOK 6.5 billion. The home mortgage portfolio managed on behalf of Storebrand Livsforsikring AS as of 31.12.2024 is NOK 17.5 billion. As the buyer, Storebrand Livsforsikring AS, has acquired both cash flows and most of the risk and control. The loans were therefore derecognised in the bank's balance sheet in accordance with IFRS 9. Storebrand Bank ASA receives management fees for the work being done with the sold portfolio. The bank has recognised NOK 67.1 million as revenue in the accounts for 2024.

Purchase and sale of bonds between companies in the Storebrand Group

Storebrand Livsforsikring AS has invested NOK 75 million in covered bonds issued by Storebrand Boligkreditt AS.

Other related parties

Storebrand Bank ASA conducts transactions with related parties as part of its normal business activities. The terms for transactions with senior employees and related parties are stipulated in notes 40 for Storebrand Bank ASA.

1) Applies to the merger with Kron AS. Kron is included in the result for the period with the full year 2024. Storebrand Bank ASA has received a capital contribution of value as of 30.09.2024 and NOK 62 million is a negative result in NOK as of 30.09.2024. See note 1 for more information on the merger of Kron.

The entire share capital of NOK 990 million made up of 66.000.000 shares (of nominal value NOK 15) is owned by Storebrand ASA.

The equity changes with the result for the individual period, equity transactions with the owners and items that are entered directly to total comprehensive income. Share capital, the share premium reserve and other equity is evaluated and managed together. The share premium and other equity may be used in accordance with the provisions of the Public Limited Liabilities Company Act.

Storebrand Bank ASA actively manages the level of equity in the company and the group. The capital level is tailored to the economic risk and capital requirements in which the composition of its business areas and their growth will be an important driver. The goal of the capital management is to ensure an effective capital structure and secure an appropriate balance between internal goals in relation to regulatory and the rating companies' requirements. If there is a need for new capital, this must be issued by the holding company Storebrand ASA.

Storebrand Bank ASA is a financial group subject to statutory requirements regarding primary capital under the capital adequacy regulations. Primary capital encompasses both equity and subordinated loan capital. For Storebrand Bank ASA, these legal requirements are most important in its capital management.

For further information on the group's fulfilment of the capital requirements, see note 38.

See note 36 for information regarding undrawn credit limits.

Notes

Storebrand Bank ASA

Note 1 - Company information and accounting policies

1. Company information

Storebrand Bank ASA is a Norwegian public limited company with bonds listed on the Oslo Stock Exchange. The financial statements for Storebrand Bank ASA for 2024 were approved by the Board of Directors on 11 February 2025.

Storebrand Bank ASA is an online bank that offers traditional bank products to the Norwegian retail market. These services include home loans, consumer loans, instant access accounts and cards, a variety of savings accounts, as well as mobile and internet banking. Storebrand Bank ASA is headquartered at Professor Kohts vei 9, Lysaker.

2. Essential accounting policies

2.1. Basis for preparation of the accounts

The accounting policies applied in the company's financial statements are described below. The policies are applied consistently to similar transactions and to other events involving similar circumstances.

Storebrand Bank ASA's financial statements are prepared in accordance with the annual accounts regulations of banks, mortgage and finance companies § 1-4, 2nd paragraph b), as well as other Norwegian disclosure requirements laid down in legislation and regulations. This means that measurement and recognition are fully in accordance with IFRS® Accounting Standards as adopted by the EU, with the exception that the board's proposed dividends and group contributions are recognised as debt on the balance sheet date.

Subsidiaries are recognised according to the cost method in the parent company.

Use of estimates in preparing the annual financial statements

The preparation of the annual financial statements in accordance with IFRS requires the management to make judgements, estimates and assumptions that affect assets, liabilities, revenue, expenses, the notes to the financial statements and information on potential liabilities. Actual amounts may differ from these estimates. See Note 2 for further information.

2.2 Changes in accounting policies

In 2024, no new accounting standards have been implemented that have had a significant effect on Storebrand Bank ASA's financial statements.

2.3. New accounting standards that have not entered into force

New IFRSs that are not in force:

IFRS 18

IFRS 18 replaces IAS 1 Presentation of Financial Statements. IFRS 18 introduces new categories in the income statement, new requirements for reporting Management Performance Measures. The purpose is to provide increased transparency and comparability between companies' presentations. The standard will be implemented from 01.01.2027 and requires reworking comparative figures for 2026.

Storebrand has reviewed the new standard and assessed the effect these may have on the consolidated financial statements. Based on a preliminary assessment, it is not expected that the implementation of the standard will have a material effect on the Group's accounting policies, financial position or profit. Storebrand will continue to monitor any further updates or clarifications that may affect the ratings.

There are no other new or amended accounting standards that have not entered into force that are expected to have a material effect on Storebrand Bank ASA's financial statements.

For other descriptions of accounting policies, see Note 1 in the Storebrand Bank Group, where all accounting policies from section 2.6 also apply in full to Storebrand Bank ASA.

Note 2 - Key accounting estimates and judgements

See Note 2 in Storebrand Bank Group where descriptions of important accounting estimates and discretionary assessments also apply in full to Storebrand Bank ASA, unless otherwise discussed below.

Storebrand Bank ASA has also carried out a sensitivity analysis of expected losses for exposures in stages 1 and 2 in the event of changes to all 12-month PD estimates. If all 12-month PD estimates had increased by 10 percent, the

expected loss would have increased by about 6 percent. Correspondingly, with a 10 percent reduction of all 12-month PD estimates, the expected loss would have been reduced by about 10 percent.

See also the banking group's Note 1 Company information and accounting policies, section 2.8.4 for more information on impairment charges.

Note 3 - Merger completed during the year

On 1 October 2024, Storebrand Bank ASA entered into an agreement with Storebrand ASA to transfer 100% of the shares in Kron AS, see note 3 in the Storebrand Bank Group. Following the transfer of Kron, a mother-daughter merger has been carried out. The merger has been carried out in accordance with the Norwegian Public Limited Liability Companies Act with accounting effect from 1 January 2024.

Note 4 - Risk management

Continuous monitoring and active risk management are core areas of the bank's activities and organisation. The strategy and planning process provides guidance for the business for the next few years. Strategy and plans are determined by the Board. The board determines the risk appetite and risk limits for the different forms of risk on an annual basis.

For a more detailed description of the organisation of risk management, see Note 4 in the Storebrand Bank Group.

Note 5 - Credit risk

Credit risk is the risk of loss associated with customers or counterparties not fulfilling their debt obligations. The risk includes risk associated with lending to customers and counterparty risk on loans to credit institutions and the central bank, securities and financial derivatives. Credit risk includes potential concentration risk in the loan portfolio. Credit risk is the most significant risk in Storebrand Bank ASA. Credit risk for loans, guarantees and unused credits is most important both in terms of volume and risk level in general. This risk is discussed in the tables below. There is limited credit risk in connection with other exposure. See notes 20 and 21 for more information on the composition of the liquidity portfolio and note 23 for information on derivatives.

For a more detailed description of risk management and risk control of credit risk, see Note 5 in the Storebrand Bank Group.

Maximum credit exposure

Storebrand Bank ASA has no financial assets that are purchased or originated credit-impaired financial assets.

Credit exposure for lending activities

Retail market

Retail customers are evaluated according to their capacity and intent to repay the loan. In addition to their capacity to service debt, the customers are checked regarding policy regulations and the customers are scored using a scoring model. For other retail market customers, the overall loan to value ratio and debt servicing capability (as determined by the bank's credit policy for the segment) that apply to the portfolio are used as a basis. The securities for the portfolio are principally in properties for the retail market portfolio.

Storebrand Bank ASA has developed internal models for classifying home loans. The models estimate a loan's Probability of Default (PD), Loss Given Default (LGD), and Exposure at Default (EAD). PD estimates are based on a logistical regression model where late payment notices, reminders, overdrafts and information about assets are key explanatory variables when predicting defaults. When estimating the LGD, the loan-to-value ratio is the most important explanatory variable. Home loans are classified according to the bank's master scale, consisting of 11 risk classes from A to K, with A indicating the lowest default probability and K containing non-performing loans. The classification of home loans is automatically updated on a monthly basis. As at the end of 2024, 36.5% of the EAD was linked to home loans in risk class A, while 5.6% of the EAD was in risk classes G to J. The models are validated on an annual basis, with the accuracy of the models compared to actual outcomes.

When entering into loan commitments, Storebrand Bank ASA collects information of significance to the value of the residential property. Each quarter, the bank obtains an updated, independent valuation of residential properties from Eiendomsverdi AS. For homes where Eiendomsverdi AS does not have an up-to-date valuation (such as housing cooperative apartments, owner-tenant apartments and some leisure properties) the most recent updated market value is used until further notice. Where Eiendomsverdi AS cannot determine the market value of a property with a high degree of certainty, a "haircut" is used so as to reduce the risk of giving an inflated estimate of market value. If Eiendomsverdi AS has never received information regarding the property's market value, the value recorded at the time of entering into the contract (the deposit value) will be used. Loans such as those mentioned here constitute just under 1% of the total portfolio exposure.

In the retail market, most of the loans are secured by way of home mortgages. NOK 22.3 billion has been lent in home loans, with a further NOK 2.3 billion in undrawn credit lines. Total commitments in residential property are therefore approximately NOK 24.6 billion.

The weighted average loan-to-value ratio is 70.5% for home loans. Approximately 59% of loans have a loan-to-value ratio within 80% and about 99% have a loan-to-value ratio within 100%. Approximately 28% of the home loans have a loan-to-value ratio within 60%. The portfolio is regarded as having a low to moderate credit risk in accordance with the bank's risk appetite.

The security for non-performing loans without impairment among retail customers is essentially satisfactory. The average loan-to-value ratio for these loans is about 76%. Home loans/residential mortgages that are part of the volume of non-performing loans without impairment are NOK 170 million. The security is also good on home loans/residential mortgages between 1 and 90 days past due. Assets pledged as collateral are sold in the retail market. They are not taken over by the bank.

In the credit card and account credit portfolio, approximately NOK 232 million has been drawn, and NOK 1.2 billion is available as unused credit facilities. The consumer loan portfolio is approximately NOK 178 million.

Storebrand Bank ASA had a volume of NOK 139 million of loans with forbearance at the end of 2024. In exceptional cases, the bank grants relief for commitments with mortgages in the form of a grace period for loans with a loan-to-value ratio above 60%. Short-term grace periods are also granted for consumer loans. At the end of 2024, there was approximately NOK 18 million in consumer loans registered with grace periods, and thus forbearance.

Lending to customers is measured at fair value based on valuation techniques. The valuation techniques use interest rate curves from Reuters and credit spreads for equivalent new loans as per the end of December.

Financial assets are designated at fair value through the profit and loss account (FVTPL) the first time they are recognised where another measurement would result in an inconsistency in the profit and loss account. Objective market prices are used for securities where these exist. Valuation techniques involving the use of interest rate curves from Reuters and credit spreads from external providers are used for the remaining securities.

Note 6 - Liquidity risk

Liquidity risk is the risk that the company will be unable to refinance its obligations (refinancing risk) or that the company will not be able to refinance its obligations without incurring substantial additional expenses (price risk).

For a more detailed description of risk management and risk control of liquidity risk, see Note 6 in the Storebrand Bank Group.

Non-discounted cash flows - financial liabilities

NOK million	0 - 6 months	7 - 12 months	2 - 3 years	4 - 5 years	More than 5 years	Total	Book value 2024	Book value 2023

Total financial liabilities 2023	30,710.4	697.7	2,745.1	457.0	137.2	34,747.4		29,375.7

The overview of non-discounted cash flows includes interest. Implicit forward interest rates based on the yield curve on 31 December 2024 are used to calculate interest costs for lending with FRN conditions. The call date is used as the maturity date on subordinated loans. The maturity overview does not take account of the fact that the issued bonds have extended maturity date, i.e. the original maturity date is used. Deposits from and liabilities to customers are on call deposits or deposits locked in for less than 6 months.

Note 7 - Market risk

Market risk is risk of a change in value due to financial market prices (such as interest rates, exchange rates, credit spreads) or volatility differing from what was expected.

For a more detailed description of risk management and risk control of market risk, see Note 6 in the Storebrand Bank Group.

For changes in market risk that occur during the first year, the effect on the result and equity will be as shown below based on the balance sheet as at 31 December 2024:

Effect on accounting income

NOK million	2024	2023
Interest rate -2,0%	-68.0	-71.7
Interest rate +2,0%	68.0	71.7

Effect on accounting result/equity ¹⁾

NOK million	2024	2023
Interest rate -2,0%	-68.0	-71.7
Interest rate +2,0%	68.0	71.7

1) Before tax

Financial interest rate risk

NOK million	2024	2023
Interest rate -2,0%	5.2	19.0
Interest rate +2,0%	-5.2	-19.0

The note shows the accounting effects over a 12 month period, as well as the immediate financial effect of an immediate parallel interest rate change of + 2.0 percentage points and - 2.0 percentage point respectively. In calculating the

accounting risk, note has been taken of the one-off effect such an immediate rate change has on the items that are recognised at fair value and the value of the security, and the effect that the change in interest rates would have on the net profit for the remaining duration of the interest rate before the change in interest rates has an effect on income and expenses. Items that would be affected by the one-time effect and are recorded at fair value are the investment portfolio, fixed interest rate loans and derivatives. Items that would be affected by the one-time effects and which are recorded using hedging accounting are borrowings with fixed interest rate. In calculating the financial effect, account has been taken of changes in market value of all items on the balance sheet that such an immediate interest rate change will lead to.

See also note 24 regarding foreign exchange risk.

Note 8 - Operational risk

Operational risk

The assessment of operational risks is linked to the ability to achieve targets and to implement plans. Operational risk is defined as the risk of financial loss or damaged reputation due to inadequate or failing internal processes, control routines, systems, human error, or external events.

For a more detailed description of risk management and risk control of operational risk, see Note 8 in the Storebrand Bank Group.

Compliance risk

Compliance risk is the risk of the company incurring public sanctions, financial losses, claims for damages and/or loss of reputation as a result of non compliance with external or internal rules.

For a more detailed description of risk management and risk control of compliance risk, see Note 8 in the Storebrand Bank Group.

Note 9 - Climate risk

Risk of increased loan losses as a result of climate change or the transition to low emissions

The macroeconomy in some areas/regions is weaker, particularly as a result of transition risks. The debtor risk increases as a result. The value of security objects develops relatively weaker than other objects as a result of physical risk (market values develop weaker in areas where, for example, there is a greater risk of flooding, landslides, precipitation than the market in general) and/or transition risk (market values fall more in areas with greater transition risk due to weaker economic development). The risk may materialise in higher loan losses. Developments in climate risk in the portfolio are monitored in order to be able to act in the event of undesirable changes. Climate risk has not affected the loss provisions in the accounts for 2024. Reference is made to a further description of climate risk in the annual report.

Note 10 - Valuation of financial instruments

Storebrand Bank ASA conducts a comprehensive process to ensure that financial instruments are valued as closely as possible to their market value. Publicly listed financial instruments are valued on the basis of the official closing price on stock exchanges, supplied by Reuters and Bloomberg. Bonds are generally valued based on prices collected from Reuters, Bloomberg and Nordic Bond Pricing. Bonds that are not regularly quoted will normally be valued using recognised theoretical models. The latter is particularly applicable to bonds denominated in Norwegian kroner. Discount rates composed of the swap rates plus a credit premium are used as a basis for these types of valuations. The credit premium will often be specific to the issuer, and will normally be based on a consensus of credit spreads quoted by a selected brokerage firm.

Unlisted derivatives, including primarily interest rate and foreign exchange instruments, are also valued theoretically. Money market rates, swap rates, exchange rates and volatilities that form the basis for valuations are supplied by Reuters, Bloomberg and Norges Bank.

Storebrand Bank ASA carries out continual checks to safeguard the quality of market data that has been collected from external sources. These types of checks will generally involve comparing multiple sources as well as controlling and assessing the likelihood of unusual changes.

The Storebrand Group categorises financial instruments valued at fair value into three different levels which are described in more detail below. The levels express the differing degrees of liquidity and different measurement methods used. The company has established valuation models to gather information from a wide range of well-informed sources with a view to minimising the uncertainty of valuations.

Level 1: Financial instruments valued on the basis of quoted prices in active markets for identical assets

Bonds, certificates or equivalent instruments issued by nation states are generally classified as level 1. When it comes to derivatives, standardised stock index futures and interest rate futures will also be included at this level.

Level 2: Financial instruments valued on the basis of observable market information not covered by level 1

This category encompasses financial instruments that are valued based on market information that can be directly observable or indirectly observable. Market information that is indirectly observable means that the prices can be derived from observable related markets. Level 2 includes shares or equivalent equity instruments for which market prices are available, but where the volume of transactions is too limited to fulfil the criteria in level 1. Shares in this level will normally have been traded during the last month. Bonds and equivalent instruments are generally classified in this level. Moreover, interest rate and foreign exchange swaps, non-standardised interest rate and foreign exchange derivatives are classified in level 2.

Level 3: Financial instruments valued on the basis of information that is not observable according to the definition for level 2

Financial instruments classified as level 3 includes all loans to customers, loans to and deposits with credit institutions and the investment in VN Norge AS.

The value of fixed-rate loans is determined by discounting the agreed cash flows over the remaining maturity by the current discount rate adjusted for market spread. The discount rate that is used is based on a swap interest rate (mid swap) with a maturity that corresponds to the remaining lock-in period for the underlying loans. The market spread that is used on the date of the balance sheet is determined by assessing the market conditions, market price and the associated swap interest rate.

The value of home loans with a floating interest rate are valued at nominal value less expected credit loss. Loans without any substantially higher credit risk than at initial recognition are valued at nominal value. Loans where there has been a significant increase in credit risk since initial recognition or loans where there is objective evidence of loss, are valued at nominal value less expected credit loss over the lifetime of the loan.

Under equities, it is primarily the investment in VN Norge AS. The value of the shares is calculated on the basis of the price of the shares in VISA Inc. and the exchange rate USD / NOK. The value has also been adjusted for a liquidity and general uncertainty discount of 14%.

Subordinated loans		827,4		827,4	828,7	817,1	828,6
Total financial liabilities 31.12.2024		39 779,6		39 779,6	39 866,9		
Total financial liabilities 31.12.2023		28 745,0				28 745,0	28 747,5

The fair value of interest-bearing securities, debt securities issued and subordinated loans is based on normal valuation techniques. Cash flows are discounted over the remaining term with the current discount factor. The discount factor used is based on a swap rate (mid swap) with a maturity that corresponds to the maturity of the underlying financial instrument. For the items loans to and deposits with credit institutions and loans to customers fair value is amortised cost with deduction of expected credit loss. For the items loans to and deposits from credit institutions and deposits from and due to customers fair value is approximately equal to amortised cost.

Sensitivity analysis on financial instruments at fair value

Loans to customers at fair value through other comprehensive income (OCI)

The value of home loans with a floating interest rate are valued at nominal value less expected credit loss. Loans without any substantially higher credit risk than at initial recognition are valued at nominal value. Loans where there has been a significant increase in credit risk since initial recognition or loans where there is objective evidence of loss, are valued at nominal value less expected credit loss over the lifetime of the loan.

Equities

This item consist of shares in VN Norge AS. At the end of the year, the value of the shares is calculated on the basis of the price of the shares in VISA Inc. and the exchange rate USD / NOK. The value has also been adjusted for a liquidity and general uncertainty discount of 14%.

1) Services purchased from the group contain expenses relating to bank production, IT services, joint administrative functions, financial and legal services, marketing activities, HR and skills development, purchasing, information services and savings advice.

Note 15 - Pensions

Storebrand is obliged to have an occupational pension scheme pursuant to the Mandatory Occupational Pension Act. The company's pension schemes meet the requirements of the law. Storebrand Group has country-specific pension schemes.

Storebrand's employees in Norway have a defined-contribution pension scheme. In a defined-contribution scheme, the company allocates an agreed contribution to a pension account. The future pension depends upon the amount of the contributions and the return on the pension account. When the contributions have been paid, the company has no further payment obligations relating to the defined-contribution pension and the payment to the pension account is charged as an expense on an ongoing basis. For regulatory reasons, there can be no savings in the defined-contribution pension for salaries that exceed 12G (G = National Insurance Scheme basic amount). Storebrand has pension savings in the savings product Extra Pension for employees with salaries exceeding 12G.

The premiums and content of the defined-contribution pension scheme are as follows:

- Saving starts from the first krone of salary
- Savings rate of 7 per cent of salary from 0 to 12 G (the National Insurance basic amount "G" was NOK 124,028 at 31 December 2024)
- In addition, 13 per cent of salary between 7.1 and 12 G is saved.
- Savings rate in Extra Pension for salary over 12 G is 20 per cent.

The Norwegian companies participate in the Joint Scheme for Collective Agreement Pensions (AFP). The private AFP scheme provides a lifelong supplement to an ordinary pension and is a multi-employer pension scheme, but there is no reliable information available for inclusion of this liability on the statement of financial position. The scheme is financed by means of an annual premium that is defined as a percentage of salaries from 1 G to 7.1 G, and the premium rate was 2.7 % in 2024 and is unchanged in 2025.

There are also pension liabilities for the defined-benefit scheme related to direct pensions for certain former employees and former board members.

Reconciliation of pension assets and liabilities in the statement of financial position

NOK million	2024	2023
Present value of insured pension liabilities	4.6	4.2
Fair value of pension assets	-4.9	-4.6

Pillar two – minimum taxation

During January 2024, the Norwegian authorities decided to introduce changes to the tax legislation with effect from the 2024 income year. The new legislation introduces a supplementary tax, a global minimum taxation that will prevent profit shifting between countries, and ensure an effective tax rate of at least 15 percent.

Storebrand is covered by the new regulations, but it appears that Norwegian companies can make use of the exemption rules in Safe Harbour. Deferred tax related to the new regulations has therefore not been recognised in the Bank's accounts for 2024.

Note 18 - Classification of financial assets and liabilities

NOK million	Amortised cost	Fair value through profit and loss	Fair value through other comprehensive income (OCI)	Total book value 2024	Total book value 2023
Financial assets

Total financial assets 2024	15,182.1	5,375.7	21,481.1	42,038.8	
Total financial assets 2023	13,389.4	3,229.0	13,812.8		30,431.2
Financial liabilities					
Deposits from and due to credit institutions	3,495.8			3,495.8	338.4
Deposits from and due to customers	31,403.4			31,403.4	23,948.2
Debt securities issued	4,139.1			4,139.1	3,632.3
Derivatives		11.9		11.9	19.6
Other liabilities	515.8			515.8	608.6
Subordinated loans	828.7			828.7	828.6
Total financial liabilities 2024	40,382.8	11.9	0.0	40,394.7	
Total financial liabilities 2023	29,356.1	19.6			29,375.7

Note 19 - Ownership interests in group companies

Shares in subsidiaries

NOK million	Business registration number	Registered office	Ownership interest	Share of votes	Share capital	Acquisition cost	Book value 2024	Book value 2023
Storebrand Boligkreditt AS	990645515	Lysaker	100 %	100 %	496.8	3,577.0	3,577.0	3,391.5
Total investments in subsidiaries						3,577.0	3,577.0	3,391.5

Income from ownership interests in group companies

NOK million	2024	2023
Received group contribution from Storebrand Boligkreditt AS	237.7	59.9
Total income from ownership interests in group companies	237.7	59.9

Note 20 - Interest-bearing securities at fair value through profit and loss

NOK million	2024 Fair value	2023 Fair value
Sovereign and Government Guaranteed bonds	350.5	670.1
Mortgage and asset backed bonds	4,161.2	2,126.5
Total bonds and other fixed-income securities at fair value through profit and loss	4,511.6	2,796.5
Modified duration	0.43	0.17
Average effective yield per 31.12.	4.87 %	4.91 %

The portfolio is mainly denominated in NOK. Calculated effective yields are weighted to give an average effective yield on the basis of each asset's share of the total interest rate sensitivity.

Note 21 - Interest-bearing securities at amortised cost

NOK million	2024		2023	
	Book value	Fair value	Book value	Fair value
Public issuers and Government Guaranteed Bonds	2,545.4	2,544.5	3,436.8	3,427.5
Mortgage and asset backed bonds	2,757.5	2,764.8	2,469.6	2,471.4
Total bonds at amortised cost	5,302.9	5,309.3	5,906.4	5,898.8
Modified duration		0.27		0.13
Average effective yield per 31.12.		4.88 %		4.97 %

All securities are denominated in NOK. The effective yield for each asset is calculated using the observed market price. Calculated effective yields are weighted to give an average effective yield on the basis of each asset's share of the total interest rate sensitivity.

Note 22 - Buyback agreements (repo agreements)

NOK million	2024 Book value	2023 Book value
Liabilities related to Repurchase agreements (Repo)		
Bonds received as collateral	3,151.6	1,009.4
Posted as loans and deposits from credit institutions	3,103.7	1,009.4
Assets linked to Repo debt (reverse Repo)		
Received bonds not recognised in the balance sheet	2,743.0	
Posted as loans to and deposits with credit institutions	2,702.6	

Storebrand Bank ASA has entered into three repo agreements as of 31 December 2024. Bonds received as collateral are not recognised as all risk and return on the securities are retained by the counterparty.

Note 23 - Financial derivatives

Financial derivatives are linked to underlying amounts which are not carried on the balance sheet. In order to quantify the volume of derivatives, reference is made to such underlying amounts as underlying principal, nominal volume, etc. Different calculation methods are applied to nominal volume for different types of financial derivatives, and this figure expresses the scope of risk and positions of financial derivatives.

Gross nominal volume primarily provides information on scope, while net nominal volume provides a certain expression of risk positions. However, the nominal volume for different instruments is not necessarily comparable, considering the risk exposure. As opposed to gross nominal volume, the calculation of net nominal volume also takes into account the sign for the instrument's market risk exposure, by differing between so-called asset positions and liability positions.

An asset position in a share derivative implies a positive change in value if share prices rise. For interest derivatives, an asset position implies a positive change in value if interest rates are reduced – as is the case with bonds. An asset position in a currency derivative generates a positive change in value if the exchange rate against the NOK sees an increase. The average gross nominal volume is based on daily calculations of gross nominal volume.

NOK million	Gross nominal volume ¹⁾	Gross recognised financial assets	Gross recognised debt	Net financial assets/debt in the balance sheet	Net amounts taken into account netting agreements		Net amount
					Financial assets	Financial debt	
Interest derivatives ²⁾	1,495.0	41.0	11.7				29.3
Currency derivatives	174.2		0.3				-0.3
Total derivatives 31.12.2024	1,669.2	41.0	11.9				29.1
Total derivatives 31.12.2023	996.1	37.8	22.0				17.2

1) Values as at 31.12:

2) Interest derivatives include accrued, not due, interest.

Investments subject to netting agreements /CSA

NOK million	Recognised assets	Recognised liabilities	Net assets	Collateral		Net exposure
				"Cash (+/-)"	Securities (+/-)	
Investments subject to netting agreements/CSA	31.6	10.0	21.6		-100.0	121.6
Investments not subject to netting agreements/CSA	9.4	1.9	7.5

Total loans, guarantees and undrawn credit limits	375.6	13,812.8	351.3	0.3	2,472.3	17,012.2

Undrawn credit limits relate to the unused portion of credit limits approved on overdraft accounts and credit cards, as well as the unused portion of lending limits on flexible mortgages.

The classification into customer groups is based on Statistics Norway's standard for sector and business classification. The individual customer's classification is determined by the customer's primary activity.

Overview of loan loss provisions and securities on loans in stage 3

NOK million	2024				
	Gross amount	Loan loss provisions	Net value	Value of collateral	Type of collateral
Non-performing loans without evidence of impairment					
- retail exposures secured by mortgages on immovable property	100.3	-4.6	95.7	153.4	residential property
- unsecured retail exposures including credit cards exposures	69.7	-49.1	20.6		
- other exposures including SME exposures					
Total non-performing loans without evidence of impairment	170.0	-53.7	116.3		
Loss-exposed loans with evidence of impairment					
- retail exposures secured by mortgages on immovable property	59.8	-21.5	38.3	85.9	residential property
- unsecured retail exposures including credit cards exposures	0.1		0.1		
- other exposures including SME exposures	0.5	-0.3	0.2		
Total loss-exposed loans with evidence of impairment	60.4	-21.9	38.6		

The bank has loans of NOK 24.4 million in stage 3 where no loan loss provisions have been made due to the value of collateral.

NOK million	2023				
	Gross amount	Loan loss provisions	Net value	Value of collateral	Type of collateral
Non-performing loans without evidence of impairment					
- retail exposures secured by mortgages on immovable property	50.0	-2.1	47.8	63.2	residential property
- unsecured retail exposures including credit cards exposures	54.2	-38.0	16.2		
- other exposures including SME exposures					
Total non-performing loans without evidence of impairment	104.2	-40.1	64.1		
Loss-exposed loans with evidence of impairment					
- retail exposures secured by mortgages on immovable property	54.8	-13.8	41.1	60.6	residential property
- unsecured retail exposures including credit cards exposures					
- other exposures including SME exposures	0.6	-0.6			
Total loss-exposed loans with evidence of impairment	55.4	-14.4	41.1		

The bank has loans of NOK 42.3 million in stage 3 where no loan loss provisions have been made due to the value of collateral.

Note 30 - Forbearance

Loans with payment forbearance are loans where relief has been granted as the customer has payment problems, and the bank would not have granted these terms in an ordinary loan issue.

NOK million	2024			2023		
	Stage 2	Stage 3	Total	Stage 2	Stage 3	Total
Loans to customers secured:						
Forbearance loans to customers, gross	114.1	6.2	120.3	93.6		93.6
Expected credit loss (ECL)	-0.6	-0.3	-0.8	-0.2		-0.2
Forbearance loans to customers (secured loans), net	113.5	5.9	119.5	93.4	0.0	93.4
Loans to customers unsecured:						
Forbearance loans to customers, gross	11.2	7.0	18.3	13.2	4.8	18.0
Expected credit loss (ECL)	-1.4	-4.9	-6.3	-0.8	-3.5	-4.3
Forbearance loans to customers (unsecured loans), net	9.8	2.1	11.9	12.4	1.3	13.7
Total loans to customers:						
Forbearance loans to customers, gross	125.3	13.2	138.6	106.8	4.8	111.6
Expected credit loss (ECL)	-2.0	-5.2	-7.2	-1.0	-3.5	-4.5
Forbearance loans to customers (secured and unsecured loans), net	123.3	8.0	131.4	105.8	1.3	107.1

In exceptional cases, the Bank grants relief for commitments with mortgages in the form of a grace period for loans with a loan-to-value ratio above 60%. Short-term grace periods are also granted for consumer loans.

Note 34 - Hedge accounting

Storebrand Bank ASA complies with IFRS 9 for hedge accounting. Storebrand Bank ASAs interest rate risk strategy is defined in the interest rate risk policy, which sets frameworks for limiting the company's interest rate risk exposure. The company uses fair value hedging to reduce the interest rate risk on borrowings with fixed interest terms. The risk that is hedged in accordance with the interest rate risk policy is Nibor. This entails that separate credit risk is not hedged by keeping the credit spread constant as when established. Hedged risk accounts for approximately 90% of the total interest rate risk exposure in the loans. Fair value hedging of the hedged item is interest rate hedged by entering into an interest rate swap in which we swap from fixed to variable interest to reduce the risk associated with future changes in interest rates. The hedging satisfies the requirements for hedge accounting at individual transaction level by a hedging instrument being directly linked to a hedged item and the hedging relationship being adequately documented.

All hedging relationships are established with an identical fixed interest profile, i.e. fixed interest, principal, coupon dates and maturity, both in the object and the instrument. The instrument swaps from fixed interest to variable interest quoted on Nibor three months. The fixed leg is between 2% to 4.5%. The hedging relationship is expected to be highly effective in counteracting the effect of changes in fair value due to changes in interest rates. Net recognised changes in value of fair value hedges are due to changes in value resulting from changed market interest rates, i.e. hedged risk. This is entered in the accounts under "Net unrealised changes in value of financial instruments". The hedging efficiency is measured based on the basic "Dollar Offset" method with regard to prospective efficiency.

Storebrand Bank has identified the following sources of inefficiency:

- Change in value of the short leg (Nibor 3 months).
- Credit risk for counterparty.

It is not expected that these factors will create significant inefficiency. No other sources of inefficiency were identified during the financial year.

NOK million	2024			2023		
	Contract/ nominal value 0-4 years	Fair value ¹⁾ Assets	Fair value ¹⁾ Liabilities	Contract/ nominal value 0-3 years	Fair value ¹⁾ Assets	Fair value ¹⁾ Liabilities

Other debt	42.4	32.2
Total other liabilities	515.8	608.6

Note 36 - Off balance sheet liabilities and contingent liabilities

Off balance sheet liabilities and contingent liabilities	2024	2023
Guarantees	0.3	0.3
Undrawn credit limits	5,183.1	4,904.7
Loan commitments, retail market	2,711.5	2,607.0
Total contingent liabilities	7,894.8	7,511.9

Guarantees are mainly payment guarantees and contract guarantees. See also note 27. Undrawn credit limits relate to the unused portion of credit limits approved on overdraft accounts and credit cards, as well as the unused portion of lending limits on flexible mortgages. Undrawn credit limits includes NOK 1.7 billion in credit facility to Storebrand Boligkreditt AS.

Storebrand Bank ASA are engaged in extensive activities and may become a party in legal disputes.

Note 37 - Collateral

Collateral and security pledged

Storebrand Bank ASA has not received or issued any collateral except securities pledged as collateral in Norges Bank and in other credit institutions (see the tabel below).

NOK mill.	2024	2023
Booked value of bonds pledged as collateral for the bank's lending from Norges Bank	4,489.9	1,428.6
Booked value of securities pledged as collateral in other financial institutions	101.1	152.3
Total	4,591.0	1,580.9

Securities pledged as collateral are linked to lending access in Norges Bank for which, pursuant to regulations, the loans must be fully guaranteed with collateral in interest-bearing securities and/or the bank's deposits in Norges bank. Storebrand Bank ASA has F-loans totaling NOK 210 million in Norges Bank as of 31 December 2024.

Note 38 - Capital adequacy

Capital adequacy calculations are subject to special consolidation rules in accordance with the regulation on consolidated application of the capital adequacy rules etc. (the "Consolidation Regulation"). The Storebrand Bank group is defined pursuant to Section 5 of the Consolidation Regulation as a financial group comprising solely or mainly undertakings other than insurance companies. Profit for the year has been added to net primary capital.

Net primary capital

Loans transferred to Storebrand Boligkreditt AS

Storebrand Bank ASA sells loans to the mortgage company Storebrand Boligkreditt AS. Once the loans are transferred, Storebrand Boligkreditt AS assumes all the risks and benefits of owning the loan portfolio. It is Storebrand Boligkreditt that receives all the cash flows from the loan customer. The bank and Storebrand Boligkreditt have not signed any agreements concerning guarantees, options "or similar in relation to the loan portfolio in Storebrand Boligkreditt AS. Storebrand Bank ASA will ensure the transfer and return of loans as needs" change, i.e. when there is a need to increase borrowing, switches from fixed to variable interest rates, switches to employee loans and switches to home equity loans. The costs form part of the contractual management fees.

Loans in Storebrand Boligkreditt AS that do not perform remain in the company. According to the service agreement with Storebrand Bank ASA, these loans will be treated in the same way as non-performing loans in the bank. A special report on non-performing loans in Storebrand Boligkreditt AS is prepared. These loans are not included in the mortgage company's total collateral.

Loan to employees can be transferred to Storebrand Boligkreditt AS. The difference between the market interest rate and the subsidised interest rate is covered monthly by the company in which the debtor is employed.

Overview of transferred loans to/from Storebrand Boligkreditt AS

NOK million	2024	2023
To Storebrand Boligkreditt AS - accumulated transfer	46,265.9	45,089.5
From Storebrand Boligkreditt AS - this year's transfer	1,534.7	833.1

Storebrand Bank ASA has not pledged any guarantees in connection with loans to Storebrand Boligkreditt AS.

Loans sold to Storebrand Livsforsikring AS

Storebrand Bank ASA has sold mortgages to sister company Storebrand Livsforsikring AS. In 2024, there has been sold loans of total NOK 6.3 billion. The home mortgage portfolio managed on behalf of Storebrand Livsforsikring AS as of 31.12.2024 is NOK 17.5 billion. As the buyer, Storebrand Livsforsikring AS, has acquired both cash flows and most of the risk and control. The loans were therefore derecognised in the bank's balance sheet in accordance with IFRS 9. Storebrand Bank ASA receives management fees for the work being done with the sold portfolio. The bank has recognised NOK 67.1 million as revenue in the accounts for 2024.

Credit facilities with Storebrand Boligkreditt AS

The bank has issued two credit facilities to Storebrand Boligkreditt AS. One of these is a normal overdraft facility, with a ceiling of NOK 8 billion. This has no expiry date, but can be terminated by the bank on 15 months' notice. The other facility may not be terminated by Storebrand Bank ASA until at least 3 months after the maturity date of the covered bond and the associated derivatives with the longest period to maturity. Both agreements provide a minimum capacity to cover at least interests and payments on covered bonds and derivatives the following 31 days.

Other related parties

Storebrand Bank ASA conducts transactions with related parties as part of its normal business activities. The terms for transactions with senior employees and related parties are stipulated in note 40.

Loans to employees

NOK million	2024	2023
Loans to employees of Storebrand Bank ASA	185.0	129.0
Loans to employees of Storebrand group excl. Storebrand Bank ASA	993.7	421.4

Employees can borrow up to 7 million kroner at subsidized prices while excess loan amounts follow market interest rates.

Number of employees

	2024	2023
Number of employees 31.12	179	167
Average number of employees	173	167
Number of person-years 31.12	177	166

Storebrand Bank ASA and the Storebrand Bank Group

- Declaration by the members of the Board and the CEO

On this date, the Board of Directors and the Chief Executive Officer have considered and approved the annual report and annual financial statements for Storebrand Bank ASA and the Storebrand Bank Group for 2024 (2024 Annual Report).

The consolidated financial statements have been prepared in accordance with the EU-approved International Financial Reporting Standards (IFRS) and the associated interpretations, as well as additional Norwegian disclosure requirements pursuant to the Norwegian Accounting Act and the Financial Reporting Regulations for Banks, Finance Companies, etc. The annual financial statements for the parent company have been prepared in accordance with the Norwegian Accounting Act, Financial Reporting Regulations for Banks, Finance Companies, etc., as well as additional requirements in the Norwegian Securities Trading Act. The annual report for the Group and parent company complies with the requirements of the Norwegian Accounting Act and Norwegian Accounting Standard no. 16 as at 31 December 2024.

In the best judgement of the Board and the CEO, the annual financial statements for 2024 have been prepared in accordance with applicable accounting standards, and the information in the financial statements provides a fair and true picture of the parent company's and Group's assets, liabilities, financial standing and results as a whole as at 31 December 2024. In the best judgement of the Board and the CEO, the annual report provides a fair and true overview of important events during the accounting period and their effects on the annual financial statements for Storebrand Bank ASA and the Storebrand Bank Group. In the best judgement of the Board and the CEO, the descriptions of the most important elements of risk and uncertainty that the group faces in the next accounting period, and a description of related parties' material transactions, also provide a true and fair view.

Lysaker, 11 February 2025
The Board of Directors of Storebrand Bank ASA

To the General Meeting of Storebrand Bank ASA

Independent Auditor's Report

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Storebrand Bank ASA, which comprise:

- the financial statements of the parent company Storebrand Bank ASA (the Company), which comprise the statement of financial position as at 31 December 2024, the income statement, statement of changes in equity, statement of cash flow for the year then ended and notes to the financial statements, including a summary of significant accounting policies, and
- the consolidated financial statements of Storebrand Bank ASA and its subsidiaries (the Group), which comprise the statement of financial position as at 31 December 2024, the income statement, statement of changes in equity, statement of cash flow for the year then ended, and notes to the financial statements, including material accounting policy information.

In our opinion

- the financial statements comply with applicable statutory requirements,
- the financial statements give a true and fair view of the financial position of the Company as at 31 December 2024, and its financial performance for the year then ended in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway, and
- the consolidated financial statements give a true and fair view of the financial position of the Group as at 31 December 2024, and its financial performance and its cash flows for the year then ended in accordance with IFRS Accounting Standards as adopted by the EU.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company and the Group as required by relevant laws and regulations in Norway and the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

To the best of our knowledge and belief, no prohibited non-audit services referred to in the Audit Regulation (537/2014) Article 5.1 have been provided.

We have been the auditor of Storebrand Bank ASA for 7 years from the election by the general meeting of the shareholders on 9 April 2018 for the accounting year 2018.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. The Company's business activities are largely unchanged compared to last year. We have not identified regulatory changes, transactions or events of material significance for the 2024 financial statements that qualified as new Key Audit Matters.

Key Audit Matters

How our audit addressed the Key Audit Matter

Impairment of loss to costumers

Loans to customers represents a considerable part of the total assets. The assessment of impairment losses is a model-based framework which includes elements of management judgement and involves considerable volume of data which make the assessment complex.

In accordance with IFRS 9, write-downs on loans are to be based on more forwardlooking assessments, so that write-downs reflect expected losses. The use of models to determine expected credit losses entails judgement. We have focused on:

- classification of the various credit portfolios by risk and asset type
- identification of impaired loans or loans presenting a significant increase in credit risk;
- the categorisation of loans into stages; and
- determination of significant parameters in the model

The Bank's business is mainly concentrated on the retail market. The impairment model is designed to estimate loan-loss impairment provisions for this segment.

In addition, individual provisions are made for loans with incurred credit losses or where there is objective evidence of impairment. This assessment also requires judgements by management.

The group's note 1, 2, 5, 16, 24, 25, 26, 27, 28, 29, and the company's note 1, 2, 5, 16, 25, 26, 27, 28, 29 and 30 in the annual report is relevant for the description of the Bank's model and processes to estimate loan-loss impairment provisions.

In our audit of expected loss provisions, we assessed and reviewed the design and effectiveness of internal control to provide assurance for the assumptions and calculation methods used. We obtained a detailed understanding of the process in order to assess:

- the calculation and methodologies used by management;
- whether the management-approved model was in compliance with the framework and the model worked as intended;
- the reliability of the sources of the data used in the model.

Our assessment did not indicate material errors in the model or material deviation from IFRS 9.

For loans where there were objective evidence of impairment and where the write-down amount was individually calculated, we tested a sample of loans. We assessed the value of the underlying collateral and other judgmental assessments made by management. In order to assess the value of the underlying collateral we reviewed, among other things, the rates that were available when the loans were granted. Furthermore, we tested whether loans with individual loss provisions were correctly classified in the model and assessed the reasonableness and completeness of the total individual loss provisions. We did not uncover material deviations based upon our tests.

The Bank use external service providers to operate some IT systems. The auditor of the relevant service organizations is used to evaluate the design and effectiveness of and test established controls to ensure the integrity of the IT systems relevant to financial reporting. The auditor's testing included, among other things, whether key calculations made by the core systems were performed in line with expectations, including interest rate calculations and amortization. The testing also included data integrity, changes to and access to the systems. In order to decide whether we could use the information in the auditor's reports as the basis for our assessments, we examined the auditor's competence and objectivity and reviewed the reports sent and considered possible deviations and measures taken. We also carried out testing of access controls to IT systems

and segregation of duties where necessary for the sake of our own specific audit procedures.

Our assessments and tests substantiate that we could rely on that the data handled in- and the calculations made by the Company's external core system were reliable. This was a necessary basis for our audit.

We read the notes to the accounts and found that the information relating to the impairment model, various parameters and discretionary assessments was sufficiently comprehensive and in accordance with the accounting rules.

Other Information

The Board of Directors and the Managing Director (management) are responsible for the information in the Board of Directors' report and the other information accompanying the financial statements. The other information comprises information in the annual report, but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the information in the Board of Directors' report nor the other information accompanying the financial statements.

In connection with our audit of the financial statements, our responsibility is to read the Board of Directors' report and the other information accompanying the financial statements. The purpose is to consider if there is material inconsistency between the Board of Directors' report and the other information accompanying the financial statements and the financial statements or our knowledge obtained in the audit, or whether the Board of Directors' report and the other information accompanying the financial statements otherwise appears to be materially misstated. We are required to report if there is a material misstatement in the Board of Directors' report or the other information accompanying the financial statements. We have nothing to report in this regard.

Based on our knowledge obtained in the audit, it is our opinion that the Board of Directors' report

- is consistent with the financial statements and
- contains the information required by applicable statutory requirements.

Our opinion on the Board of Directors' report applies correspondingly to the statement on Corporate Governance.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation of financial statements of the Company that give a true and fair view in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway, and for the preparation of the consolidated financial statements of the Group that give a true and fair view in accordance with IFRS Accounting Standards as adopted by the EU. Management is responsible for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's and the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern. The financial statements of the Company use the going concern basis of accounting insofar as it is not likely that the enterprise will cease operations. The consolidated financial statements of the Group use the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error. We design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's and the Group's internal control.
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's and the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company and the Group to cease to continue as a going concern.
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves a true and fair view.
- obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

From the matters communicated with the Board of Directors, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should

not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

Report on Compliance with Requirement on European Single Electronic Format (ESEF)

Opinion

As part of the audit of the financial statements of Storebrand Bank ASA, we have performed an assurance engagement to obtain reasonable assurance about whether the financial statements included in the annual report, with the file name storebrandbank-2024-12-31-0-nb.zip, have been prepared, in all material respects, in compliance with the requirements of the Commission Delegated Regulation (EU) 2019/815 on the European Single Electronic Format (ESEF Regulation) and regulation pursuant to Section 5-5 of the Norwegian Securities Trading Act, which includes requirements related to the preparation of the annual report in XHTML format, and iXBRL tagging of the consolidated financial statements.

In our opinion, the financial statements, included in the annual report, have been prepared, in all material respects, in compliance with the ESEF regulation.

Management's Responsibilities

Management is responsible for the preparation of the annual report in compliance with the ESEF regulation. This responsibility comprises an adequate process and such internal control as management determines is necessary.

Auditor's Responsibilities

For a description of the auditor's responsibilities when performing an assurance engagement of the ESEF reporting, see: <https://revisorforeningen.no/revisjonsberetninger>
